Universal Apple

An extra large, fine flavored Winter Apple. Excellent keeper and shipper; valuable new variety. 2-yr-old, strong, 4 to 5 ft. trees, \$1.00 each. (See page 7).

Bosc—King of Pears

The largest and most perfect Pear. Excellent spicy flavor; beautifully shaped; will thrive under almost any conditions; bears immense crops every year. Not affected by blight. Large, 5 to 7 ft. trees, \$1.25; 4 to 5 ft., 90c each. (See page 11).

Ponderosa Peach

The most valuable Peach grown; is making growers rich, sells for \$1.00 a bushel more than others; larger and of better quality than Elberta, more productive and surer bearer. We recommend it above all others. Strong, 3 to 4 ft. trees, 50c each; extra large, 4 to 6 ft. trees, 60c, delivered. (See page 4).

A Word of Appreciation to Our Customers

We take pleasure in again presenting our annual catalog, and with it we wish to express our sincere thanks for your continued orders and co-operation. Your letters praising our stock, service and business methods, have surely been appreciated.

We again renew our pledge of honor to serve you as conscientiously and as earnestly as in the past. With our new and larger packing plants and other improvements for handling orders quicker and better, and the unusually favorable growing season we have enjoyed we will be able to give you even better service this year than in the past.

This is our thirty-sixth year in the nursery business here at Makanda, and it has been indeed gratifying to see our business increase from year to year. We attribute this largely to our satisfied customers who have been untiring in telling neighbors and friends of the superior quality of our stock, our extra low prices and our absolutely honest method of handling orders. We are continually receiving letters from parties that you have told of the splendid success you have been getting from our stock, and they are now placing their orders with us. We trust you will continue to give us your business and splendid co-operation.

If you have never planted Bradley grown stock, why not start this year? We guarantee to give you strictly first-class high quality stock, that is true to name, and to give you as good or better service than you have been receiving, and believe we can save you money. The fact that we have been pleasing our customers for thirty-six years should be proof of our ability and absolute honesty. Read the many letters received from customers and allow us to serve you in a like manner.

Bradley Brothers are in no way connected with any other nursery company, either at this or any other place.

Terms and Suggestions

Safe Arrival Guaranteed

All Transportation Paid

We believe our customers like to know exactly without figuring extras such as postage, express or packing charges, how much things are going to cost them before they buy, hence all the prices in this catalog include delivery to your nearest post or express office. You know just what the stock is going to cost you delivered.

Our Location. Makanda is on the great Illinois Central railroad running north and south connecting with all the trunk lines running east and west, which assures prompt and safe delivery of your stock. We are right in the heart of one of the largest and most widely known fruit belts in the world.

Remittance. Should accompany the order. This is best because it saves time, expense, chance of errors, and insures quicker and better service. However we book orders and hold stock in customer's names when one-fourth of the amount accompanies the order.

How to Remit. Any way most convenient to you; Check, Money Order, Bank

Draft or Cash. If cash, send registered mail.

When to Order. The best time to order is just as soon as you receive the catalog. Orders are handled here as they are received, stock is selected and reserved in customer's name, until proper time for planting in your locality. While we are usually able to make shipments on very short notice, it is not, however, advisable to wait until planting time before ordering as we are likely to be sold out on some of the best varieties, and be forced to return your money.

Time of Shipment, February to May: However unless shipping date is given all orders will be shipped in time to reach you at the proper planting time for your location. We keep familiar with weather conditions in every part of the United States during the shipping season.

Our Guarantee Is: Entire satisfaction or your money back.

This Catalog is Our Only Salesman. We employ no agents. If we had to pay salesmen's commissions, salaries and traveling expenses we could not afford to sell our high grade stock as cheaply as we do as it would add about 50 per cent to the cost. We sell our stock direct to you. The United States Department of Agriculture says in the Farmers Bulletin No. 113: If the farmer makes his purchase direct from the Nurserymen he will save the expense of the middleman or agents, and is less liable to the mistakes and injuries that may occur through repeated handling. Deal direct with the grower. It's the sure way to get good stock and the only way to save money when buying trees and plants.

We Solicit Correspondence. Every inquiry will be given our prompt and personal attention. Every question will be answered honestly and as accurately as possible. Will also be glad to give you any information regarding planting. However we furnish free with every order where requested a book of planting instructions. Are always glad to offer suggestions as to best varieties for different localities. This catalog conveys to you the absolute truth with regard to descriptions of every variety and you can be assured of growing fruit just as described.

Why Bradley Grown Trees are Better

First, because they are grown in soil especially adapted for the growing of young plants and trees; because they are grafted and budded on the right kinds of seedlings, and the work done by experts who have spent more than thirty years specializing in

the production of certain kinds of trees and plants.

Because through our thirty-six years of experience we have learned just what cultivation is needed to make the most hardy, thrifty, well rooted and developed trees and plants. The future development of all young stock depends almost entirely on the root system; trees and plants that have the proper root system will make a rapid growth and will bear fruit much quicker than will stock that is not so equipped.

Our scientific method of digging the trees assures you of receiving them with all their roots left on. We know of many nurseries that leave about half of the roots in the ground when they dig the trees.

Because they are freshly dug and never allowed to dry out, and are budded and grafted on whole root seedlings, buds are taken from bearing orchards that are free from disease or insect pests and are known to be true to name and description.

Packing is done in an especially constructed packing plant in the most scientific manner. Wet moss is kept on the roots from the time they are taken up until they are planted in your soil.

The overwhelming expression of public confidence in Bradley grown trees is one of your strongest guarantees that you will have the best that can be produced when you plant our stock.

Every tree, plant or shrub sold by us has been duly inspected by a duly appointed inspector of the Department of Agriculture, and found free from dangerous insects or plant diseases.

From Our Customers

West Union, W. Va., Nov. 3.

Dear Sirs: We received the hedge and shrubs, they were in fine condition. Many thanks.
J. HOWARD MAXWELL.

Dorchester, Ill., March 26, 1926.

Gentlemen: I received the order of fruit trees a few days ago in fine shape, they are fine trees.
W. HENRICHES.

Welton Junction, Iowa, April 29, 1926.

Dear Sirs: Received my berry plants all O. K., they sure were fine plants.
HERSCHEL J. SCHMIDT.

Pittsburgh, Pa., April 13, 1926.

Gentlemen: Received my order of peach trees in very good condition, and after being in the ground one week, all seem to have started to grow; also the pears and cherries look to be of the best stock. I want to thank you for the way these trees were packed and for the quality of the stock. Thanking you for past favors, I am,
Yours truly, F. W. MASHEY.

Muskegon, Mich., May 10, 1926.

Dear Sirs: Thanking you for the nursery stock I received in best condition; I shall recommend your stock to all my friends. My hedge is now watched by many as I live on a corner lot; people inquire where that fine hedge came from.

Your customer,
H. WIESE.

Sheridan, Wyoming, May 26, 1926.

Sirs: Received the asparagus roots all safe and in good shape and they are progressing fine.
MRS. JOHN HAVER.

Canton, Pa., June 14, 1926.

Dear Sirs: Some time ago I sent to you for nursery stock; it came all O. K. Why I did not write before, I wanted to wait and see how they came out. They are all growing fine and they were the nicest nursery stock that came in our neighborhood. The strawberries have blossoms and green berries on them. I thank you very much for the Bradley's Beauty Rose, it is growing fine.
Yours truly,
J. L. KELTZ.

Peaches That Pay Big Profits

Our seedlings were started from natural Peach pits produced in Tennessee and raised on land never before occupied by Peach trees. Our Peach trees are budded with buds cut from the heaviest bearing trees in our own bearing orchards; we know that they are true to name; we have excellent stock to offer this season; it is thrifty and first class in every way, and we feel sure you will be more than pleased with it.

If you have a small farm or a little garden space that will grow a tree, by all means plant Peaches. They come into bearing in two or three years, bear heavy crops; always bring high prices and nothing is so delicious as a good, ripe, juicy Peach with the sweet juice running down the corners of your mouth while eating it, especially if it is picked fresh from your own trees.

Southern Illinois is a great Peach belt. The fruit grown here is famous for its quality and beauty; and the trees started here have a hardiness and thriftiness that is even better known by growers everywhere.

COLLECTION NO. 1

Twelve Big Yellow Beauties

The following six varieties listed in order of ripening, earliest to latest. Rochester, Early Elberta, Elberta, J. H. Hale, Ponderosa, Krummel's October. These commercial varieties of the United States are the largest yellow freestone Peaches known, and always command the highest market price. Covering a ripening season of nearly three months, they are, or should be grown in every orchard; no better collection could be selected for any purpose.

Peach Collection. Two each of the above six varieties. Twelve trees in all, 3 to 4 feet, prepaid, for only **\$3.00**

COLLECTION NO. 2

Twelve Big White Beauties

With this Collection you will have Peaches from May until snow flies:

- | | |
|--------------------|----------------|
| 2 Mayflower. | 2 Niagara. |
| 2 Carman. | 2 Heath Cling. |
| 2 Bell of Georgia. | 2 Snow Flake. |

Twelve 3 to 4 ft. trees, delivered to your door for **\$2.75**

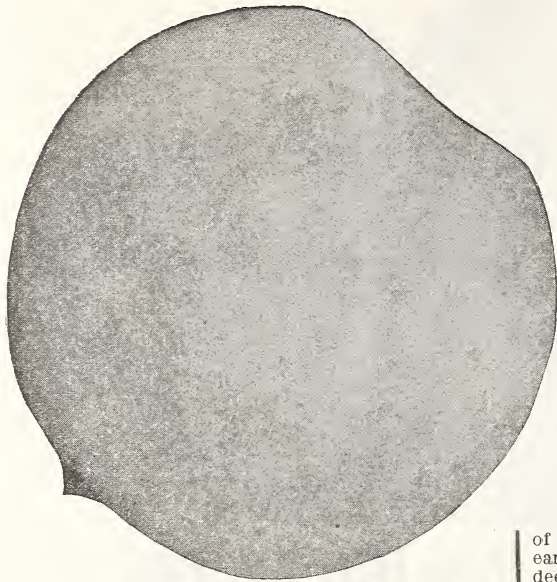

THE EDGEWOOD POULTRY FARM
W. C. Myers, Prop., Staunton, Ill.

Gentlemen:—

Last season I bought 250 peach trees of you and am so well pleased with them, that I wish to order some more stock this season.

BOTH ABOVE COLLECTIONS FOR \$5.00.

SATISFIED CUSTOMERS ARE OUR GREATEST ASSETS

Rochester Peach

EARLY ELBERTA. The greatest early yellow Peach ever produced. As compared with Elberta it is larger, 10 days earlier, better colored, and of quality unsurpassed; has smaller seed, is finer grained, less fuzzy and a wonderful shipper. Fine flavor, melting and buttery; sweet and delicious. It colors all over before it ripens, which makes it a great market variety. Hardy, young and prolific bearer.

ELBERTA. One of the greatest commercial Peaches on the market today, because it is well known the world over. This variety is very popular all over the country and there are more of these grown than any other kind. The tree is very hardy, productive and a uniform cropper. The fruit is large, yellow with red cheek, juicy and high flavored. Flesh is yellow and fine. Freestone Peach and ripens in August.

ROCHESTER. The earliest real good yellow freestone Peach we know of. It is in a class by itself because it is the only good sized, yellow freestone Peach ripening in July. The fruit is large, yellow with a most attractive red blush; juicy and delicious and keeps well; an excellent shipper. Its greater sweetness over other Peaches requires only half the usual quantity of sugar in canning. The tree is a strong grower; early and regular bearer of big crops and absolutely hardy. Ripening before Early Elberta.

J. H. Hale—"Million Dollar Peach"

Mid-season yellow freestone—ripens just after Elberta. Originated by Mr. J. H. Hale, "The Peach King." Solid and round as a ball; a great shipper, a splendid keeper; brings top prices and big profits; vigorous, sturdy trees. In size is one-third larger than Elberta and is more highly colored. The skin is deep crimson, smooth, tight and without fuzz. The pit separates easily from the flesh. Ripens 5 days after Elberta.

KRUMMEL'S OCTOBER. The largest, handsomest and best of the very late yellow freestone Peaches. Ripens after all other good yellow Peaches are gone and commands high prices. Highly flavored and a favorite for sweet pickling; the only freestone Peach that will stand up when so pickled.

The Famous Ponderosa Peach

The giant four-in-one Peach, the new variety that is making growers rich. The supreme yellow Peach, most delicious yellow variety known. Huge size, glorious, flashing, red and yellow beauties, with a crisp, tender, juicy laden flesh and an indescribable, exquisite flavor, its veritable nectar, soft, melting, all that a perfect Peach can be, and is fully entitled to the name it bears, as it would be from another point of view, to-wit: the best seller, the best eater, the best canner, the best preserver, in fact it is the king of all mid-season varieties; a quick grower, an early bearer and enormously productive. Has deep yellow, thick skin; flesh deep yellow, firm, fine grained, sweet and luscious. Fruit much larger than Elberta. Often bears at one and two years old. One grower picked five bushels from one 3-year-old tree that sold for \$4.00 per bushel. Elbertas selling for \$3.00. Ponderosa should be planted in every family and commercial orchard. Ripens 10 days after Elberta.

We have other standard varieties of Peaches ripening in the order listed and covering the entire Peach season; all have many good qualities.

MAYFLOWER. The earliest peach to ripen, earliest of all peaches. A gloriously beautiful "red all over" peach. Flesh creamy white tinted with red; juicy, sweet and good.

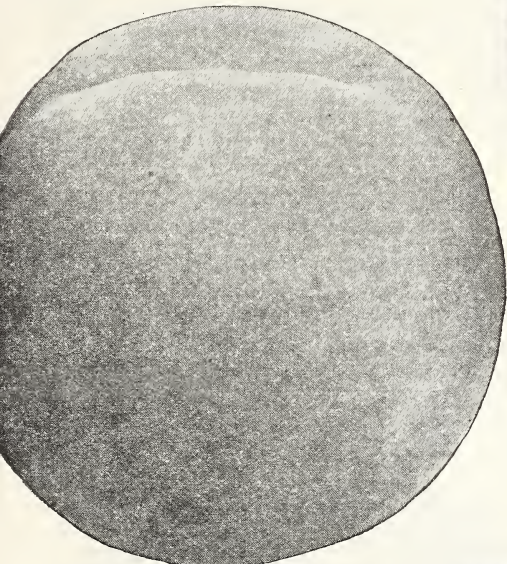

Krummel's October.

BUY FROM BRADLEY BROTHERS AND SAVE THE TRANSPORTATION CHARGES

RED BIRD. Gloriously red all over; large as Elberta and very early, ripening immediately after Mayflower. A sensation everywhere, bright glowing red color, flesh white, sweet and juicy. Tree hardy, thrifty, and an early bearer. Early in spring people are fruit hungry and will pay big prices for good early peaches.

CARMAN. Fruit large, creamy white with a deep blush; flesh tender, fine flavor and very juicy; very hardy, and productive every year. A great favorite with many growers as it is one of the most profitable varieties ever introduced. The fruit stands shipping well and is good for the orchard or garden.

CHAMPION. Fruit large, beautiful in appearance; flavor delicious, skin creamy white with red cheek; valuable for commercial orchards, extreme hardiness and splendid quality make it a favorite. Freestone.

Mayflower Peach.

Champion Peach.

BELLE OF GEORGIA. Freestone. Large and showy; skin white, red cheek; flesh white, firm and sweet, a great market variety.

CRAWFORD'S EARLY. Freestone. A large, magnificent yellow peach of good quality; very popular variety.

NIAGARA. Tree hardy, healthy in leaf and bud and bears abundantly. Fruit large, oval, yellow with brilliant red cheek. The stone parts freely from the flesh. Flavor is rich and delicious, far ahead of Elberta in this respect. It is indeed a rival for this famous peach. Season is medium early, coming in just before Elberta, overlapping it one week.

ELBERTA CLING. Great big yellow, sweet, juicy, fine flavored clingstone peach; skin yellow with red cheek, very valuable, sweet, juicy and delicious.

LEMON CLING. Large oblong yellow Peach; flesh firm, juicy and rich.

MAMMOTH HEATH CLING. One of the sweetest, juiciest, most luscious of the Peach family—the housewife's favorite for canning and preserving. Creamy white in color with a red blush; smooth, clean, with very little fuzz. Large size, small pit and handsome. Good shipper; sells for fancy prices.

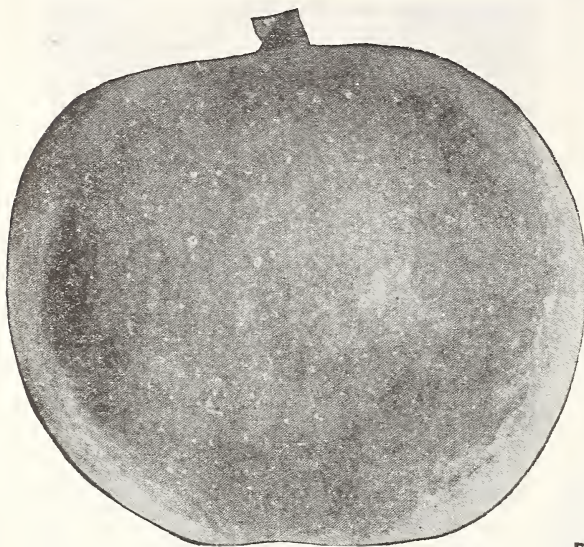

SNOWFLAKE. Latest white clingstone. Flesh firm, sweet, juicy and of a very delicious flavor. Does not bruise in handling. And a very long keeper. Keeps until Thanksgiving in any ordinary cool place. Very often lay on the ground until snow flies and keeping in perfect condition. Hangs on after all others—till hard freezing. A general favorite for sweet pickles. Tree is strong grower, extremely hardy, and does well even where other varieties fail. Bears young, everywhere—East, West, North and South. The queen of all very late Peaches. It comes on the market after all other good Peaches are gone and Peach lovers gladly pay highest prices for them. Young and abundant bearer. Ripen 40 days after Elberta.

Above is a small view of some of my Bradley trees that were out just fifteen months Nov. 13, 1925. John Hollock, Tilden, Ill.

Your dollar has twice its purchasing power when dealing direct with us, the growers, for the middle-man's commission remains in your pocket.

SAVE TRANSPORTATION CHARGES BY ORDERING FROM BRADLEY BROTHERS

Liveland Raspberry Apple.

Early Summer Apples

LIVELAND RASPBERRY. Extra early, skin of a bluish or pinkish red. Flesh white as snow, tender, fine grained, juicy, mild and just the right degree of tartness. Tree an upright grower, thrifty and abundant bearer; begin to bear the third year.

YELLOW TRANSPARENT. An upright, vigorous tree; fruit of good, crisp, sub-acid, delightful, fragrant flavor. It is one of the finest Apples to ripen in the early Summer when the demand for fruit is greatest and prices high. Yellow Transparent and Liveland Raspberry sold here in Southern Illinois last Summer from \$3.00 to \$4.50 per bushel in carload lots with a demand greater than the supply.

WILSON'S RED JUNE. Tree is extremely hardy in Minnesota, Wisconsin and Canada. Fruit enormous in size and a deep dark red color; even more brilliant than the Carolina Red June. We know of no Apple that will compare with it for beauty, size, and fine quality. Long season of ripening, very often lasting 4 to 6 weeks from the time the first Apple is ripe until they are gone, hence one of the best for family use.

EARLY HARVEST. Large; pale yellow; tender, with a fine flavor; a good grower and a heavy bearer; about the first to ripen.

Apple Tree Collection

Delicious Apples all year, the earliest to the latest. 1 Wilson Red June, 1 Liveland Raspberry, 2 Golden Sweet, 1 Grimes Golden, 2 Delicious, 2 Winter Banana, 1 Universal. 10 strong, 3 to 5 ft. trees, delivered to your door for \$3.50. Two collections for \$6.00.

Get your neighbor to order with you and save \$1.00.

Apples—KING OF FRUITS

The Apple is the king of fruits. It is a tonic as well as a nutrient, and one of the cheapest and most wholesome of foods. There's a lot of truth in the old saying: "An Apple a day keeps the doctor way." Apple trees will grow wherever corn can be raised, in fact, there isn't a state in the Union where some variety of Apples will not thrive. Every home garden and farm should have at least a few Apple trees of Summer, Fall and Winter varieties.

Yellow Transparent Apple.

WHEN YOU BUY FROM BRADLEY BROTHERS YOU KNOW JUST WHAT YOUR STOCK IS GOING TO COST DELIVERED.

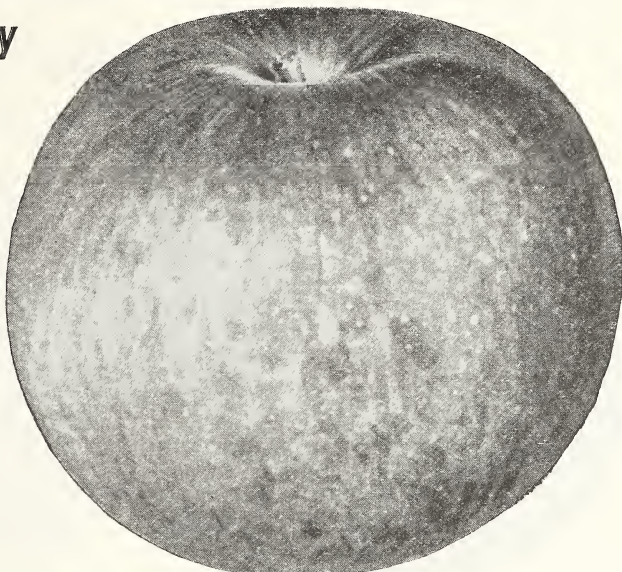

Summer and Early Fall Apples.

DUCHESS OF OLDENBURG. Medium pale yellow, streaked red; bears young and is a good cropper; useful for Fall purposes; fine for market with a great demand.

GOLDEN SWEET. Large size; attractive, clear, rich, sweet, very good in flavor and quality. Fine for home use. Tree a good grower, healthy and productive.

FALL PIPPIN. Very large; yellow; flesh tender and delicious; tree free grower and a fine bearer; valuable for table and market.

WEALTHY. Large; brilliant red; rich sub-acid flavor, excellent quality; good keeper; highly recommended; keeps well in storage.

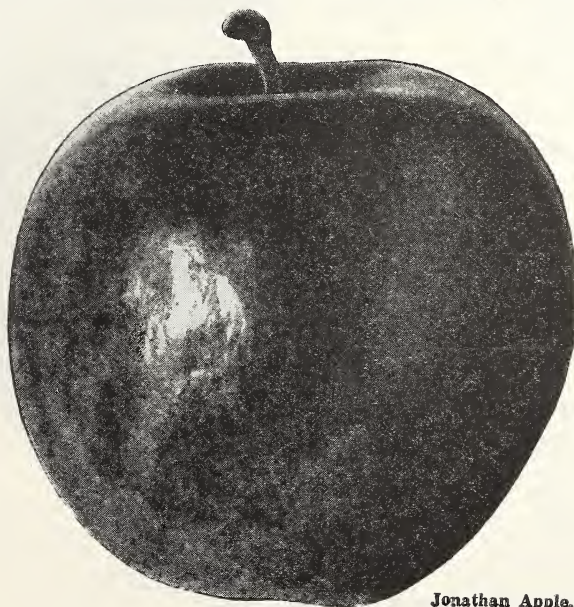

Rome Beauty Apple.

Late Fall and Winter Apples

UNIVERSAL. (See inside front cover.) Is hardy and productive; it is truly a universal Apple, can be grown any place in the United States. If you have been unable to successfully grow Apples on your soil, plant the Universal and we will guarantee you to get large crops every year. This variety will succeed where all others fail. Fruit large, bright red with yellow flesh; there is no Apple more highly flavored; is one of the best keepers we have ever grown, can be kept in basement till Spring. Trees are vigorous. Strong, upright grower, comes into bearing very young; has been

known to bear a heavy crop the second year after being planted. We consider this the best all around Apple we have, and we guarantee satisfactory results. We only have a few thousand of these trees.

ROME BEAUTY. Large, mottled and striped in different shades of red; the flavor and quality is far above the average; popular with both consumers and dealers. Rome Beauty orchards have been planted by thousands of acres and the fruit has always brought fancy prices; should be planted in every orchard and every family fruit garden.

Jonathan Apple.

JONATHAN. A brilliant glossy red Apple with a spicy rich acidity that has made it a great favorite with all lovers of deliciously flavored Apples. Succeeds everywhere. Fruit firm, crisp, tender, juicy and rich. Jonathan is a great commercial Apple and a splendid family sort and for many years Jonathan has been the standard of quality by which other sorts have been gauged.

GRIMES GOLDEN. Large; golden yellow skin, sprinkled with gray dots; flesh crisp, mild, tender, juicy and very delicious; tree hardy, vigorous and productive.

GANO. Large, handsome Apple; has a glossy deep red skin; flesh white, juicy; pleasant flavor.

McINTOSH. Very popular commercial variety of recent introduction. Tree hardy, early bearer; fruit beautiful dark red, uniform in shape and size. Flesh white, juicy, mild sub-acid; very good to best.

FAMEUSE (Snow Apple). Delectable table Apple; medium size, beautiful bright red; flesh snowy white, mild, aromatic.

WINTER APPLES—Continued

Winter Banana Apple.

BALDWIN. Large; bright red; crisp, juicy and rich; one of the most popular and profitable sorts for any purpose. Very productive, having produced 681 bushels of Apples in one season from one acre.

GOLDEN PIPPIN. It is far richer, spicier, juicier and finer flavored than Grimes Golden; of deep, rich golden color and is very handsome. One of the best eating Apples grown. For baking it has no equal. The tree bears when 3 years old; is an enormous yielder, hardy, thrifty and free from any disease. Fruit is a long keeper, and one of the last Apples on the market in the Spring. It should be in every garden.

WINTER BANANA. Fruit large, clear pale yellow with beautiful contrasting pinkish red blush. Flesh is yellowish white, tender, mild and sub-acid; flavored like a banana. Excels as a dessert Apple. Tree comes into bearing at an early age and bears annually. The fruit sells for the highest price on the market when packed for fancy trade.

DELICIOUS (Genuine). A remarkable variety, rapidly taking first rank both for commercial and home orchards. No new variety has ever so quickly gained popularity in so many different Apple sections of our country. Fruit large, nearly covered with brilliant dark red, flesh finely grained, crisp and melting, juicy with a delightful aroma; of highest quality. A splendid keeper and shipper. See front cover.

YELLOW BELLFLOWER. Large, yellow, with a tinge of red; flesh crisp, with aromatic flavor. Beautiful and excellent fruit.

YORK IMPERIAL. Medium; whitish, shaded with crimson; firm, crisp, juicy, pleasant, mild, sub-acid; vigorous and productive.

STAYMAN WINESAP. Best of the Winesap family. Deep red, distinctly striped with carmine; of large size and very handsome. The quality is delicious and indescribable; the flesh is juicy and crisp, with a mild and pleasing acidity and a flavor that has made it one of the most sought for Apples. A great favorite in all markets. Fruit very large, very fine color and a long keeper. The tree is a very rank grower, productive and very hardy even in the extreme Northern States.

WINESAP. An old standby. Standard, well known, productive variety; medium size, oblong, smooth dark red; flesh yellow, crisp, tender, juicy, firm and good.

Crab Apples

RED SIBERIAN. Yellow, with scarlet cheek; crisp, tender and juicy.

TRANSCENDENT. Golden yellow, striped with red; crisp, juicy, yellow flesh.

HYSLOP. Deep crimson, covered with blue bloom; very desirable.

Book of Culture sent on request.

WHY PAY MORE WHEN YOU CAN GET BETTER FOR LESS.

Swift, Ohio, April 15, 1926.

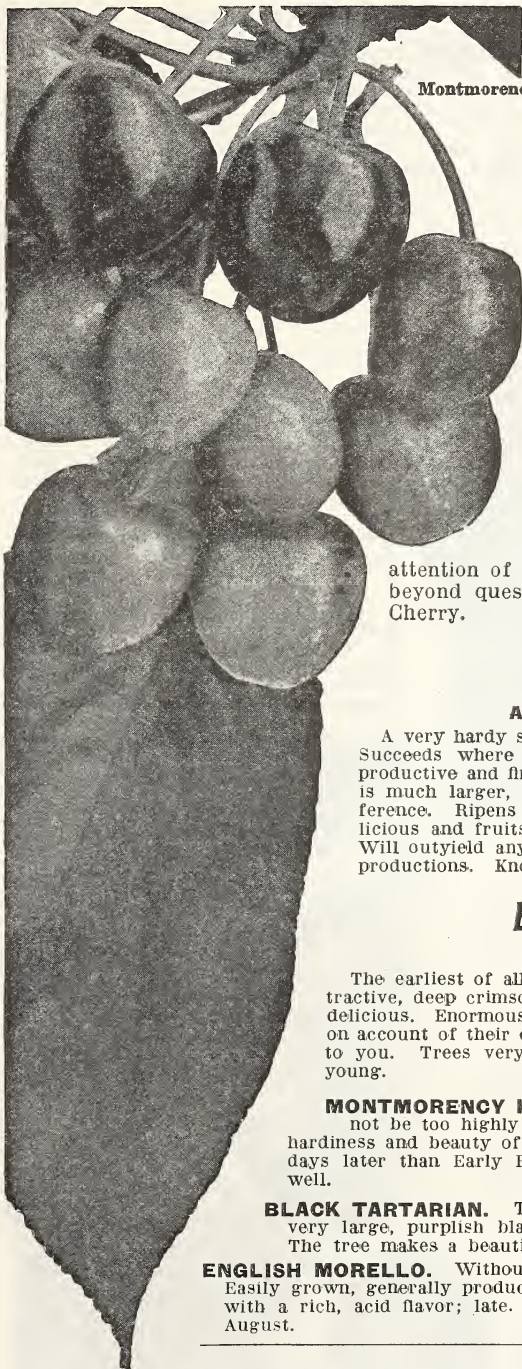

Dear Sirs: My trees arrived all O. K., not one branch broken on them. I have them planted and the buds are swelling. I was surprised to see so many small feeding roots on them. Send me your catalog later and I will place a larger order for trees from you. Thanking you for your prompt service.

JESSE V. RICH.

Stayman Winesap Apple.

SAVE THE TRANSPORTATION CHARGES, WE PAY THEM.

Select Cherry Trees

Few trees combine the useful and ornamental in such a large degree as the Cherry. They make an exceedingly handsome shade tree, worthy of a place in every yard or lawn. Or they can be grown in any spare or waste space or corner, no matter how rough and stony, needing no cultivation after the first two or three years, and they are very long lived. A rich pie filled with big, ripe, juicy Cherries of unsurpassed goodness is irresistible. None of the Cherry's goodness has been lost when it is covered with a flaky, melt-in-the-mouth crust like mother used to make. It's all there, both in the rich fruit itself, and in that sugary syrup—the pure juice of fresh, ripe Cherries. Have your own Cherries for canning and sell some to your friends. Requires least

attention of all fruits, because it has been demonstrated beyond question that no disease or pest will harm the Cherry.

Abundance Cherries

(See Front Cover)

A Wonderful, Hardy Sweet Cherry

A very hardy sweet Cherry for the North, South, East or West. Succeeds where other Sweets are failures, and is very hardy, productive and fine everywhere. A seedling of Royal Anne. Fruit is much larger, measuring three and one-half inches in circumference. Ripens one week later, is sweeter, richer and more delicious and fruits hang on the tree 10 days after they are ripe. Will outyield any other variety known. One of Burbank's latest productions. Known as the Million Dollar Cherry.

Burbank Cherries

(See outside back cover)

The earliest of all the large Cherries; is extremely large, very attractive, deep crimson color, superior quality; flesh firm, meaty and delicious. Enormously productive and bring the highest market price on account of their extreme earliness. This Cherry means big profits to you. Trees very hardy, thrifty and begin to bear when quite young.

MONTMORENCY KING. A beautiful large red sour Cherry. Cannot be too highly recommended for quality and quantity of fruit, hardiness and beauty of tree, and for its never failing crops. Ripens 10 days later than Early Richmond. Has very firm flesh and ships extra well.

BLACK TARTARIAN. This fine old variety produces immense crops of very large, purplish black fruits of mild, sweet, jelly-like consistency. The tree makes a beautiful, erect growth.

ENGLISH MORELLO. Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy, for extremely cold latitudes. August.

Newark, Ohio, March 31, 1926.

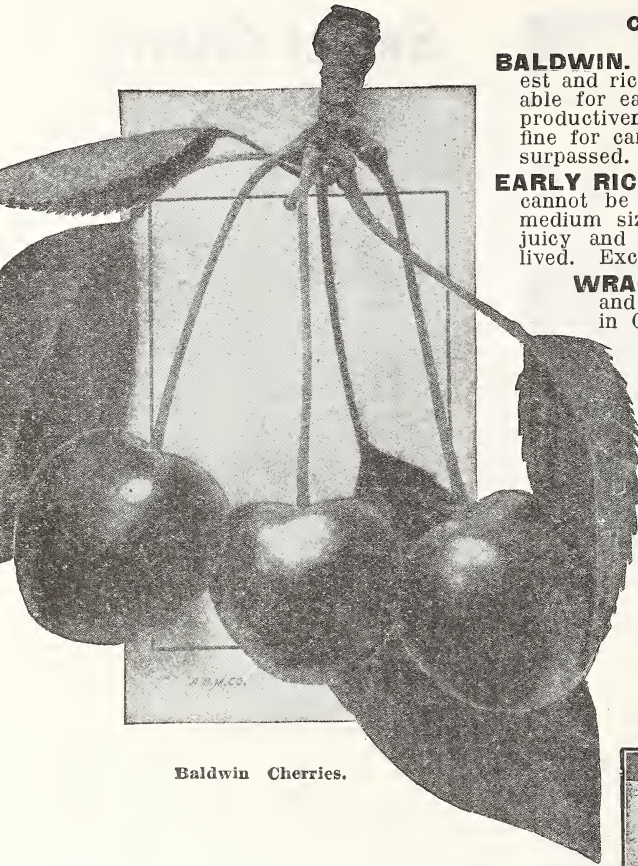

Dear Sirs: Your card dated March 29th, notifying me that trees had been shipped. I received them yesterday afternoon in nice condition and have them all planted, also a nice rain to settle the ground. Everything is perfectly satisfactory with both trees and shrubbery and I don't mind telling you that they are the best looking bunch of plants that I have received from any nursery.

You may use this any way you like.

Yours truly,

W. E. McFARLAND.

BRADLEY'S QUALITY IS KNOWN THE WORLD OVER.

Baldwin Cherries.

CHERRIES—Continued

BALDWIN. Fruit very large, dark red, the sweetest and richest of all sweet Cherries. Remarkable for earliness, quality, vigor, hardiness and productiveness. It is a splendid shipper and fine for canning. To eat out of hand it is unsurpassed. Flesh is very firm and juicy.

EARLY RICHMOND. Is a wonderful bearer and cannot be surpassed for hardiness. Fruit of medium size, roundish, dark red; flesh tender, juicy and sub-acid. Tree vigorous and long lived. Excellent for canning and drying.

WRAGG (Very late). Of the Morello type and largely planted. Especially popular in Colorado and in all sour Cherry sections. Abundant and regular bearer, dwarfish in growth and is resistant to disease. Tree very hardy and fruits the second year from planting.

YELLOW SPANISH. Large, handsome, sweet Cherry with light red cheek, firm and delicious. Tree vigorous in growth and productive.

Chambersburg, Pa., March 29, 1926.

Dear Sirs: The Nursery stock received and right here. I want to thank you, it surely is good to know that there are some people whose word is as good as their bond and that sure is Bradley Brothers. Am not in a position to order any more stock this Spring on account of sickness, but if I wish any stock later I will surely remember Bradley Brothers.

Yours respectfully,

M. SHANK.

Early Richmond Cherries.

Select Standard Pears

The Pear is one of the highest quality fruits. In nothing else that grows, and in no confection made, can you get the refreshing acid, rich in spices, the honeyed sweetness, and delicacy of flavor which you find in your own garden or orchard. Plant the right selection of varieties and you can have Pears from early summer until Christmas. The following are varieties that have stood the test and are the best.

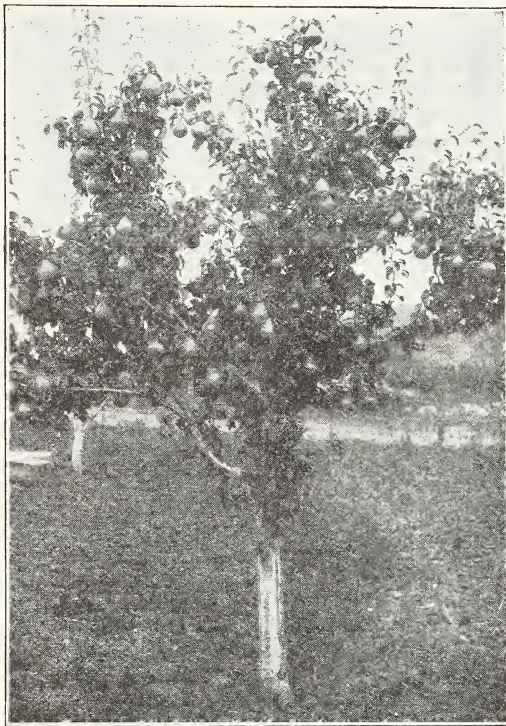

BOSC—King of Pears

After fruiting it many years we find it to be one of the most perfect pears grown. It excels everything else in the world in the way of pears. Extra large size, beautiful shape and color and of most delicious flavor, with excellent spicy flavor pronounced. This is a great money maker. Mr. Thompson of Illinois sold \$66.00 worth of pears from 4 trees and they bear the beautiful pears every year, no off seasons. They are of a long ripening season, extending over a period of 4 weeks. We especially recommend the Bosc Pear for productiveness, large size, great beauty, extra fine quality and keeping qualities. Pear much larger than Bartlett. It is a great family pear. Bosc pear trees are hard to propagate and grow in the nursery and the price of trees will always be higher than any other variety.

They are very vigorous growers in the orchard or garden, tree hardy and never affected with blight. See what loads of Pears they will bear as shown in cut. (See inside front cover page).

LINCOLN—Greatest of All Pears

Lincoln is by far the greatest pear ever introduced. The great "blight-proof pear," heavy croppers, living and bearing heavy crops long after all other varieties are dead and gone. The old original tree which is now eighty-three years old, is still bearing heavy crops of fine, sweet, juicy and delicious pears. Lincoln is the best flavored, best for eating fresh, canning, or preserving, and very handsome. Larger and better quality than Bartlett or Seckel. Brings the highest prices, selling for \$3.00 to \$4.00 a bushel, being so large that it attracts the attention of everybody, and is better than it looks. Comes into bearing at 2 years old and is an annual and prolific bearer. Should be in every home orchard and in every door yard. We have the genuine Lincoln which was originated by E. W. Jones of Illinois. (See center color page).

A Young Bosc Pear Tree Bearing a Full Crop.

Memphis, Tenn., Dec. 31, 1925.

Gentlemen: Please send me one of your 1926 catalogs, I want to send in my order as soon as possible. Have been buying plants from you for many years in the past and I always found that you shipped just as you advertised. Am starting a new berry patch in a new place this year. Thanking you for your honest dealings in the past.

Yours sincerely,

R. R. WRIGHT.

Deleon, Tex., March 4, 1926.

Bradley Brothers.

The trees you sent me came all O. K., they were very satisfactory—best roots I have seen. Arrived Feb. 19th. May send your catalog in Oct. I like your trees fine.

H. B. PAINTER.

Luretha, Ky.

The peach and apple trees I ordered two years ago grew off fine, best of any trees I ever put out, and they grew off finer.

W. D. WODDLE.

PEARS—Continued

BARTLETT. One of the best and most popular of all Pears for market and home use. It is a rich golden yellow color when ripe, often with a soft blush on the sunny side. It is very large, thin skinned; flesh buttery and melting, and has a rich, musky flavor. Tree a strong grower and a young and abundant bearer.

CLAPP'S FAVORITE. This is without doubt the most productive Pear in cultivation. It is of very large size; pale yellow color with a crimson blush. The flesh is finely grained, juicy, melting and buttery. Very desirable in all sections, and especially so where all other varieties fail.

FLEMISH BEAUTY. Large and symmetrical greenish yellow and brown, with large spots of russet; rich and juicy.

LAWRENCE. Medium to large, golden yellow, with melting, aromatic flesh. Unsurpassed as an early Winter Pear. The tree is hardy, healthy and productive, bearing large crops annually. November and December.

SECKEL. (Old-fashioned Sugar Pear.) Our most highly

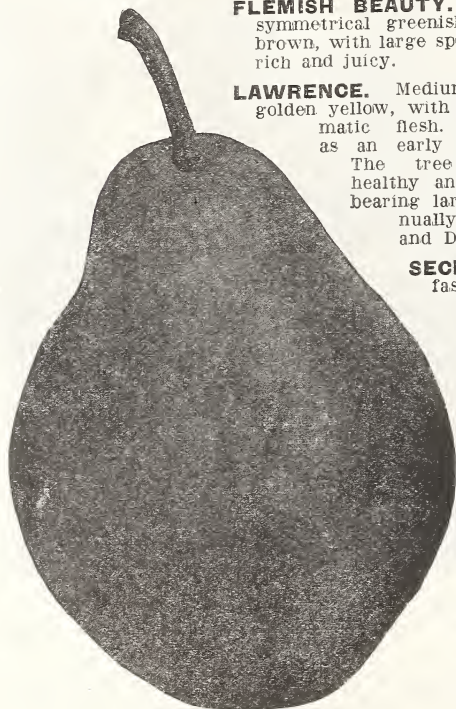

flavored Pear, the standard of excellence. Fruit small, yellowish brown, with a russet-red cheek; flesh very juicy, melting, aromatic, with a rich, spicy flavor; quality very best.

KIEFFER. Large; golden yellow when ripe; flesh slightly coarse, juicy, with quince flavor; fine for canning.

GARBER. Very productive and bears young; heavy cropper; excellent for preserving.

Flemish Beauty Pears.

Clapp's Favorite Pear.

WINTER NELIS. One of the best early Winter Pears. Medium; greenish yellow, spotted with russet; very rich flavor.

Tree and plants arrived in good condition with splendid roots. Thank you very much.

PETER HESS.

Garber Pear.

SATISFIED CUSTOMERS ARE OUR GREATEST ASSETS

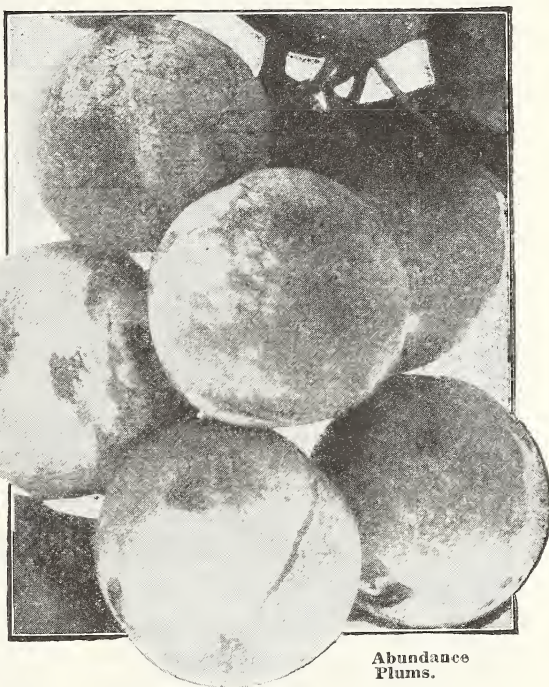

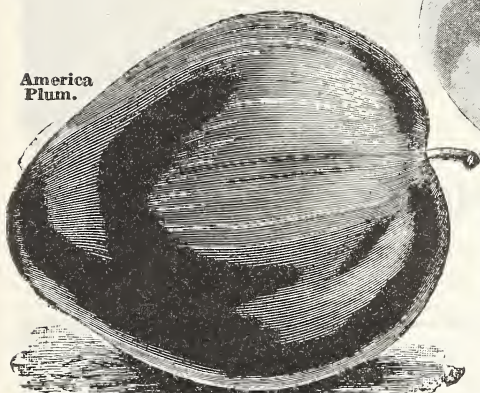

Select Hardy Plum Trees

Plums are especially fine for eating fresh, for jellies, preserving, marmalades, canning and drying. Children and invalids eat the best sweet varieties not only with safety but positive benefit. It is one of the best fruit trees for the home garden and offers great capacity for development commercially.

ABUNDANCE. Tree rapid grower, very productive, comes into bearing when quite young. Fruit large, amber, splashed with red; juicy, sweet and good.

AMERICA. Large glossy coral red, very beautiful; firm, sweet and juicy. Blooms late and scarcely ever gets killed by frost. Bears enormous crops every year. Tree very hardy and thrifty grower.

America Plum.

Abundance Plums.

MAMMOTH GOLD. A great big luscious red blushed, golden Plum of enormous size; extremely early and brings fancy prices on the market and supplies the table before other varieties are ripe. Free from rot; begin to bear the second year and are very productive.

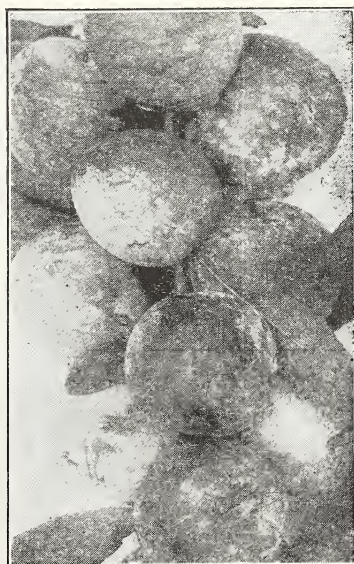

BURBANK. Fruit large, oval, reddish purple skin, flesh yellow, juicy and sweet. Tree extremely hardy and productive; succeeds everywhere.

OMAHA. Very large, round, dark rich red; flesh meaty and delicious. The pit is small and quality unsurpassed. Tree hardy as an oak and succeeds both North and South.

SHROPSHIRE DAMSON. (Improved). The largest of all Damsons and the fruit is sought after on the market at fancy prices. Trees bear enormous crops with little or no care and every garden and home should contain one or two Shropshire and Omaha trees. Dark purple, juicy and rich.

WANETA (See outside back cover). The most delicious of all Plums. The Waneta Plum is absolutely the largest and best of all Prof. Hansen's introductions, and this means they are better than anything grown at the present time. Extra large size, often 2 inches in diameter. With reasonable cultivation it is as large as a small apple, as large as a good large peach, and is hardy anywhere in the far Northern States. An early and abundant bearer. It was the largest of 10,000 seedlings. It combines hardness, immense size, delicious quality, long keeping, beautiful color, small pit; an early and prolific bearer, often producing a good crop in two years from planting. Price, 4 to 5 ft. trees, \$1.00 each; 4 for \$3.50, delivered.

MIKADO. A very large Plum of greenish yellow color; nearly round; very little suture; a very rapid grower, more so than any other. This is the most remarkable of all Plums for its enormous size, beauty and good quality. It is probably the largest Plum in existence.

Mammoth Gold Plums.

NO EXTRA CHARGES FOR PACKING OR EXPRESS WHEN YOU BUY FROM US.

PLUMS—Continued.

SHIPPER'S PRIDE. Large, nearly round; dark purple; flesh firm, juicy and sweet; excellent for canning. Hardy and productive.

WICKSON. Very large; deep maroon red; small stone; flesh firm, delicious and sweet.

YELLOW EGG. Large; yellow; oval; flesh yellow, juicy and rich. Vigorous and productive.

HANSKA. Fruit large; best quality for eating from the tree, canning, preserving and jelly.

OPATA. Begin to bear at one year old; hardy, thrifty and productive. Dark red; rich, sweet and delicious.

SAPA. Medium; fine flavor, excellent shipper; tree hardy and productive.

Wholesale Price of Plum Trees Except Waneta:

PLUM COLLECTION NO. 2.

This will give you Plums all Summer. Finest assortment grown. One tree each of the 14 varieties, 14 trees in all, delivered for \$6.00. Value, \$8.60.

Opata Plum.

Sugar Sweet Prunes

NEW STANDARD PRUNE is one of BURBANK'S latest and best productions and adds millions of dollars to the Prune industry. Trees enormous, never failing bearers, and good, strong, healthy growers; very hardy in all climates. Well grown fruit measures $4\frac{1}{4}$ inches around one way by nearly 6 inches the long way. Skin purple, with a heavy blue bloom; flesh amber or honey yellow, fine grained, juicy yet firmer than most other drying Prunes, very sweet, perfect freestone and never rots, but dries up while on the tree. Price, 4 to 6 foot trees, \$2.00 each; 3 for \$5.00. Stock very scarce.

WHY NOT GROW AND PUT UP YOUR OWN PRUNES? You can very easily do so by planting a few trees of the STANDARD Prunes.

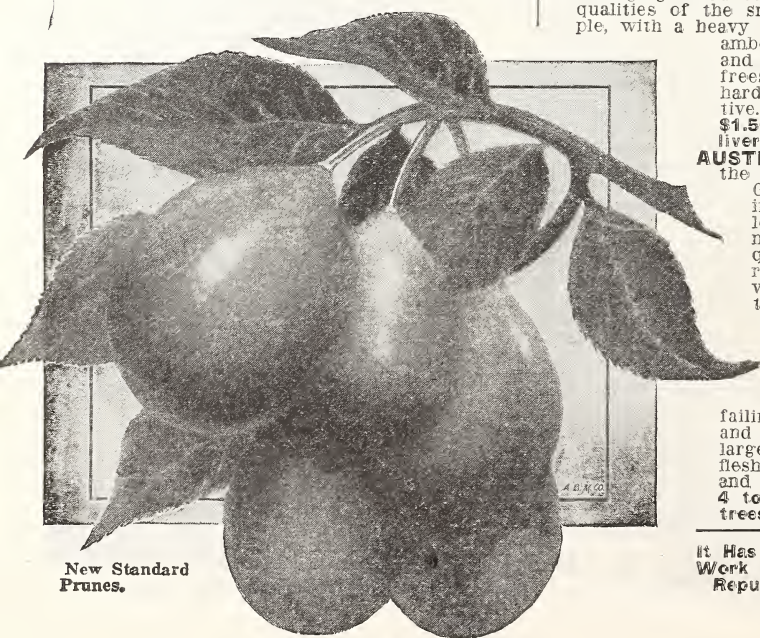

Sugar Prune Collection

One tree each of the above 4 varieties, 4 trees in all, 4 to 6 feet high and first-class trees, prepaid for **\$5.00**

GIANT PRUNE. Largest prune known; fruit averaging 2 ounces each; retaining the good qualities of the smaller varieties. Skin purple, with a heavy blue bloom; flesh yellow or amber, fine grained, juicy, firm and very sweet and a perfect freestone; never rots. Tree hardy, thrifty and very productive. Price, 4 to 6 ft., trees, \$1.50 each, or 3 for \$4.00, delivered.

AUSTRALIAN PRUNE. Fruit is the handsomest and as large as GIANT; dark reddish purple in color. Flesh golden yellow; very sweet, delicious, melting and mild; excellent quality. Good keeper, never rots; ships extra well. Tree vigorous, upright, hardy, thrifty grower, young and abundant bearer. Price, 4 to 6 ft. trees, \$1.75 each; 3 for \$4.50, delivered.

SUGAR PRUNE. Trees are enormous, never failing bearers, good, healthy and hardy growers. Fruit very large, purple skin, fine grained; flesh tender and rich in sugar and very fine for drying. Price, 4 to 6 ft. trees, \$1.25 each; 3 trees for \$3.25, delivered.

New Standard Prunes.

It Has Taken Thirty Years of Hard Work to Build up Our Present Reputation, But It Is Worth It.

Selected Apricots

The Apricot is one of the most delightfully luscious fruits grown. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early cherries and before the best early peaches.

Apricots are believed to have been a cross between the peach and the plum, having the shape and color of the peach, but in texture and smoothness of skin it resembles the plum.

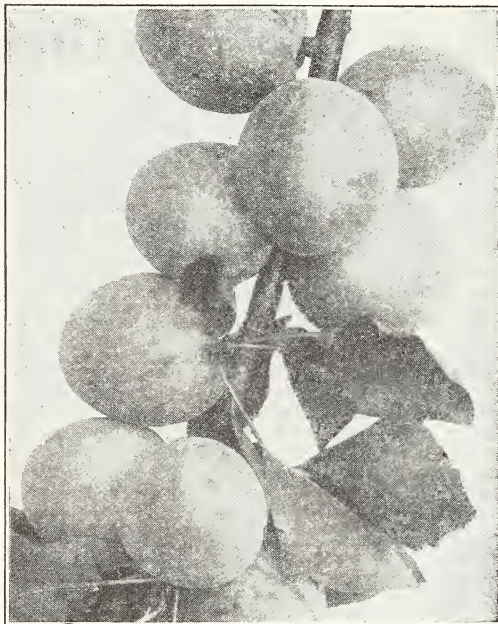

MOORPARK. One of the largest. Yellow with red cheek, firm, juicy and very productive. An old dependable variety.

SUPERB. The best Apricot for eastern planting, large size; smooth, light salmon color, with red dots; flesh yellow, firm sub-acid. Tree very hardy, vigorous grower; very productive; latest blooming Apricot; adapted to all Peach regions.

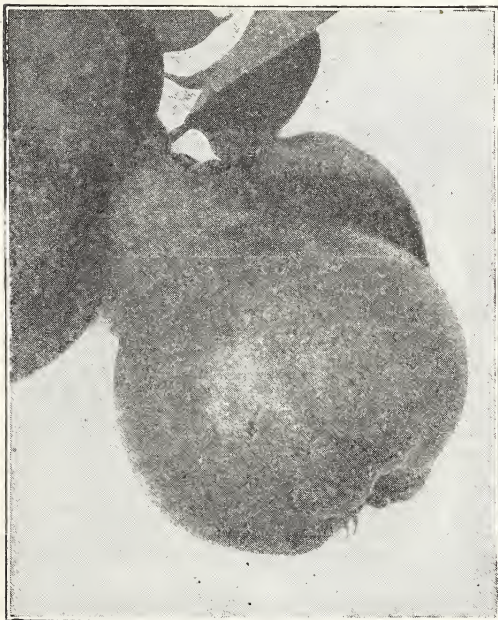

STELLA. Unsurpassed for productiveness, size and color. The hardiest Apricot known; harder than most apples, peaches and plums. Stella bears heavy crops when all other varieties are killed.

Price of Apricots, Delivered:

	Each	6	Doz.	25	100
3 to 4 foot grade	\$0.65	\$3.50	\$6.50	\$12.50	\$45.00
4 to 5 foot grade80	4.50	8.50	16.00	60.00

Moorpark Apricots.

Pineapple Quince.

Price of Quinces, Delivered:

	Each	6	Doz.	25	100
2 1/2 to 4 foot grade	\$0.85	\$4.80	\$9.00	\$17.50	\$60.00

Selected Quinces

The Quince is the ideal fruit for flavoring, preserves, jellies, marmalade and cooked fruit, being a great favorite of the housewife for this purpose. Every home should contain several trees; especially suited for yards and gardens.

PINEAPPLE QUINCE. Flavor is suggestive of the pineapple; in flavor, texture and quality it is unapproached; delightfully fragrant; fine for baking; canned or dried it retains the Quince flavor. Can be eaten like an apple, and is far the best variety for jellies and preserving. Pineapple is the most profitable; the tree is healthy, hardy and very prolific and comes in bearing when quite young. Size enormous, weighing over 1 pound each.

BOURGEAT QUINCE. A very large, handsome Quince; strong grower, young and prolific bearer. Rich and aromatic; fruit golden, big, fine flavored.

ORANGE QUINCE. Large; bright golden yellow. Flesh firm and tough until cooked, when it becomes tender, juicy and of excellent flavor. Tree productive.

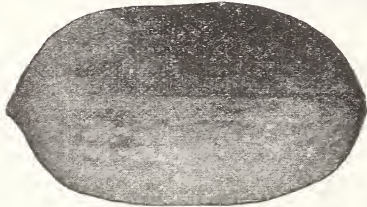

Northern Grown Nut Trees

The constant and growing demand for nuts, and the immense quantities of them yearly imported to meet it has greatly stimulated the planting of nut-bearing trees. The nut kernels are so palatable and wholesome that they should become a staple article of food here as well as in Europe. For the home garden the nut tree supplies shade and food besides adding value to the property as few other trees do.

American Black Walnut

There is great money growing the improved varieties of Black Walnuts. It does not require a very large tree to produce a bushel of nuts. Large trees may bear 8 to 10 bushels. One bushel will produce 10 pounds of meat and with the improved nut crackers one can get the kernels out in halves which sell on the market for 80c per pound. **Price, 3 to 4 ft. trees, \$1.50, delivered.**

ILLINOIS WALNUT. Originated in Illinois. Nuts are very large; shell thin; kernel full and of very fine quality. When cracked with a hammer is very easily removed in halves. Tree very thrifty, hardy; productive, often bears in 2 years and makes a fine lawn tree. **Price, 3 to 4 ft., \$1.25; 6 for \$7.00, delivered.**

Indiana Pecan.

THOMAS WALNUT. Originated in Illinois. One of the finest varieties ever produced. Nuts are very large; kernel large and full, of excellent quality. Trees begin to bear when very young; enormously productive; thrifty and hardy as an oak. They make a fine park or lawn tree. **Price, 3 to 4 ft., \$1.25; 6 for \$7.00, delivered.**

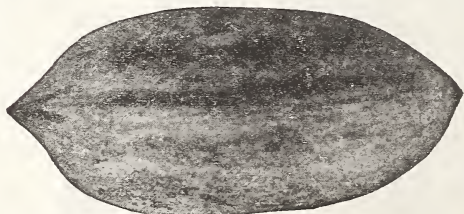

Filberts.

Illinois Walnut.

Pecans

ILLINOIS PECAN. Originated near Ware, Ill. The parent tree measures 6 feet in circumference, is 50 feet high, with a 300-foot spread, and has produced 528 pounds of nuts in a single season which sold for 30c per lb., wholesale. An acre of such Pecans is worth \$800 to \$1200 annually to the owners. The nuts are very large, thin shell, easy crackers, crisp and very fine flavored. Nuts in clusters of 5 to 6 each. Tree early and abundant yielder and has never missed a crop. **Price, 3 to 4 foot trees, \$1.50; 6 for \$8.00; per dozen, \$15.00, delivered.**

Illinois Pecan.

INDIANA PECAN. The nut is very large, shell soft, kernel full and of excellent quality. Clusters of 4 to 5 each. Tree is the greatest bearer of any Pecan tree we have ever seen, and very desirable for any purpose. **Price, 3 to 4 foot trees, \$1.25 each; 6 for \$7.00; dozen for \$12.00.**

Filberts

Filberts are easy to grow, in fact, can be grown far easier than potatoes or wheat. They are perfectly hardy and will struggle along in spite of neglect. They bear early and abundantly. Every city and country home should have some of these trees. **Price, 2 to 3 foot trees, 50c; 6 for \$2.75; doz., \$5.00, delivered.**

Hickory or Shellbark

Kernel full and plump; sweet and very delicious; tree vigorous grower and grows into a beautiful specimen; quite attractive for lawn or street planting. Bears abundantly. **2 to 3 ft., \$2.50; 3 for \$7.00, delivered.**

English or Persian Walnut

An exceedingly handsome tree for the lawn. It produces large crops of thin shelled, delicious Nuts which are always in demand at good prices. The English Walnut can be grown in the Eastern and Northern States, as well as in California and the South.

FRANQUETTE. Tree very hardy, thrifty and productive. The nuts command the highest price in the market and are the finest flavored and the best for one's use. Nuts very large, oval and very attractive; kernel full, sweet, with a very rich nutty flavor. Blooms late in the Spring and escapes the frost. Price, 2 to 3 foot trees, \$1.25; 6 for \$7.00; 3 to 4 foot trees, \$1.50; 6 for \$8.00; doz. for \$15.00, delivered.

MAYETTE. This ranks with the Franquette as one of the leading varieties. Nuts large, smooth and of attractive appearance. Kernel large, plump, crisp, and of excellent flavor. Tree hardy and abundant bearer; starts late in the Spring. Price same as Franquette.

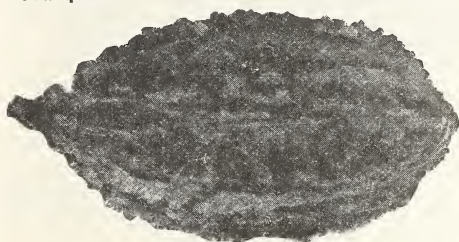

Franquette English Walnut.

Note: English Walnuts will grow anywhere the apple grows successfully when budded or grafted on the hardy native Walnuts. We use nothing else.

Hardy Butternut

Produces large, handsome, elongated nuts with rich, sweet, oily kernel, very nutritious. Tree grows rapidly and produces large crops in a few years. At present the supply is insufficient for the demands of a single city market. Butternuts, like black walnuts, are among the easiest nuts to produce. The trees bear transplanting well and are objects of great beauty, particularly when filled with nuts, which grow in clusters. Price, 3 to 4 foot trees, \$1.25; 6 for \$7.00; doz. for \$12.00, delivered.

Butternut.

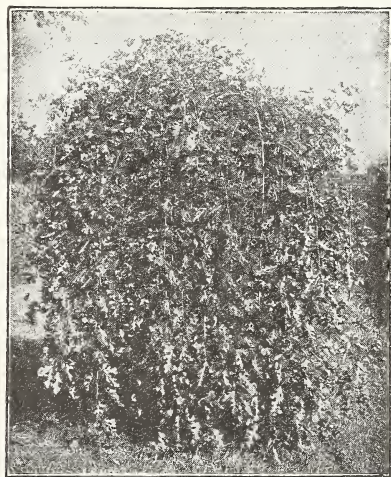

Teas' Weeping Mulberry

One of the finest, most graceful and satisfactory of the weeping trees. Umbrella shaped head, with slender, willowy branches drooping to the ground. It has beautiful, glossy foliage. Also bears a big crop of mulberries which are very delicious for pies, jams and fine for eating fresh from the tree. Price, \$3.50 each, delivered.

Catalpa Bungei.

**Bradley's
Quality
Is Known
the
World
Over**

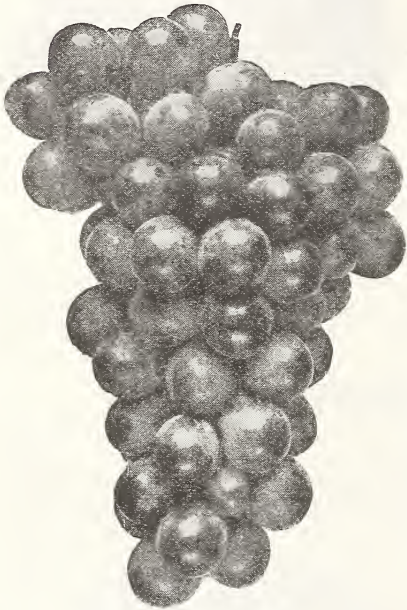

Teas' Weeping Mulberry.

Catalpa Bungei - Umbrella Catalpa

A very striking tree for formal planting. The low spreading head is about six feet from the ground, flat and rather roof-shaped, leaves large and dense, and deep green in color. One or two of these Catalpa Bungei, planted as specimens in front of the home give that formal touch that can be attained in no other way. They require no trimming and are very hardy. Two-year heads, each \$2.50, delivered. See center color page.

EVERYTHING IS SHIPPED BY PREPAID EXPRESS OR PARCEL POST.

OUR SELECT HARDY GRAPES

Campbell's Early Grapes.

CAMPBELL'S EARLY. Hand-some, black berries, with purple bloom; bunch large, double shouldered and compact. Flesh sweet to the center; skin tough and a good shipper. Early.

BETA. Bunch large and compact; berry black, medium size, very early; rank grower, extremely hardy and enormously productive. Does well in the extreme North.

CLINTON. A late black Grape, ripens two to three weeks later than Concord, very desirable for wine and preserving; berries are large and of excellent quality, very hardy and productive. The best real late Grape. Will keep until frost without dropping its berries. By including the Clinton in your collection you have Grapes over a much longer season.

CONCORD. Black. The most extensively planted and generally successful Grape in America. Bunch and berry large, fair quality, medium early; rank grower, healthy, hardy and productive.

The Grape is the most healthful of all fruits and the most highly esteemed for its many uses. It can be and should be grown by everyone who has a garden, a yard a fence or a wall. It can be confined to a stake, bound to a trellis, trained over an arbor, or extended until it covers a large tree or building and still it yields its graceful bunches of luscious fruit. They are hardy, vigorous, productive—and begin to bear the second or third year. Surely no one will allow their family to be deprived of delicious Grapes when they can be produced so easily in the garden or yard.

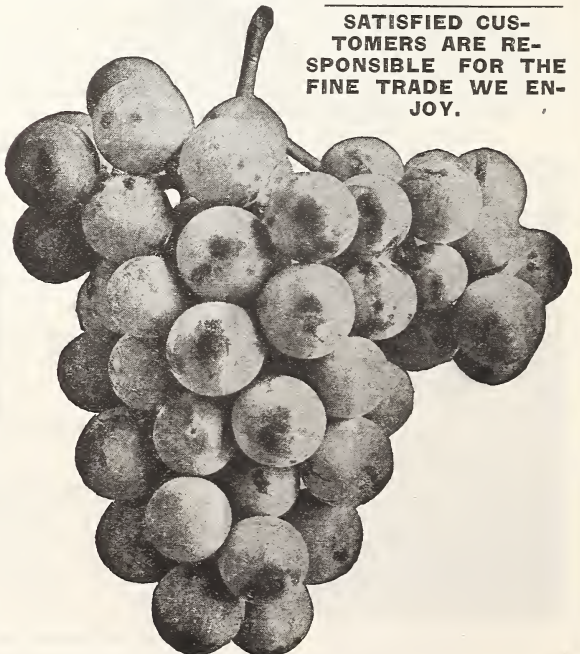

The Marvelous Grape

(See inside back cover)

Marvelous as to productiveness, size of bunch and berries. The earliest black Grape. Sweetest and best in quality. Ripens weeks ahead of Moore's Early. Markets take them very readily at the highest prices. Hardy, vigorous grower, productive, healthy and the foliage immune from rust. Grapes do not crack in wet weather; never mildew or rot, and hang well on the vine, drying up almost into raisins. One of the very best for family use as well as a commercial variety. The bunches are shouldered and weigh from 16 to 20 ounces. Pulp very tender and dissolves readily in the mouth.

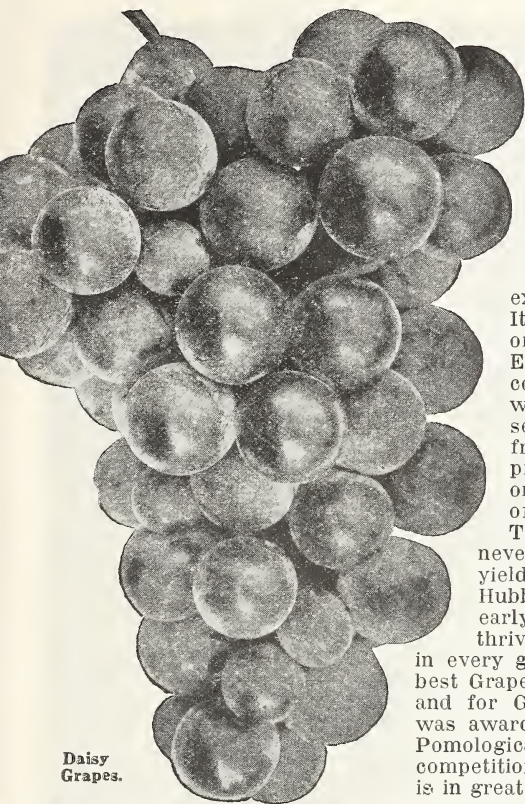

What the Experts Say of Marvelous: I believe it is the best flavored and the most delicious Grape I have ever eaten. Fruit and bunches very handsome and attractive.—H. R. ROW.

SATISFIED CUSTOMERS ARE RESPONSIBLE FOR THE FINE TRADE WE ENJOY.

Grapes.

DAISY. Black. The earliest grape known; bunch and berry medium size; fine quality. Very hardy, robust and very productive; fine for all cold sections.

IVES. Black. Bunch and berry medium; compact. Very healthy, hardy, vigorous and productive. A successful market grape.

Hot Springs National Park, Ark., Feb. 21, 1925

Gentlemen:—I received the order of trees today, they arrived in fine shape and I am more than well pleased, they are the finest I ever saw.

Yours very truly,

CLAUD L. SHARILS.

The Wonderful Hubbard

(See front cover).

The Famous Table Grape—the finest early black Grape, the sweetest, richest and most delicate Grape yet produced. The texture is tender, pulp melting, flavor pure and refined, brisk, refreshing and honey-sweet. There is no other Grape that approaches it in fine quality or flavor. Ripening 10 days before

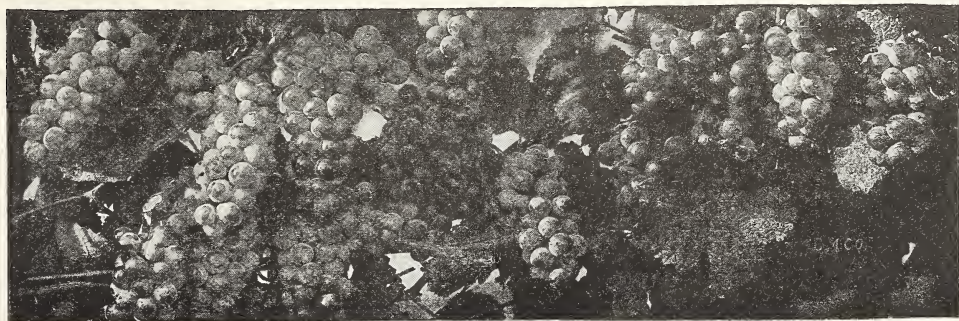

Concord, Hubbard is so rich in sugar it is excellent in flavor ten days before it is ripe. It is beyond doubt the sweetest and best flavored of any Grape including the California and European varieties. Bunches extra large, very compact, and solid; berry extra large, jet black with a thin skin; seeds few and small which separate freely from the tender pulp. The fruit sells in the open market for double the price of any other variety. The vine is a vigorous grower, enormously productive, very often yielding 40 to 60 pounds to a single vine.

The fruit is absolutely immune to rot; it has never been known to Winter kill, and always yields a full crop and ripens up to perfection. Hubbard is an ideal Grape for the North where early extra hardy varieties are wanted, and it thrives on any kind of soil and it should be planted in every garden. We consider the Hubbard by far the best Grape for the table; for jellies, canning, preserving and for Grape juice it is unsurpassed. The Hubbard was awarded the Wilder silver medal by the American Pomological Society at its meeting in Berkeley, Cal., in competition with California's best varieties. This Grape is in great demand by all Grape growers everywhere.

WORDEN. Black. This excellent grape is as hardy, healthy, vigorous and productive as Concord, better quality, sweeter, larger in bunch and berry, and several days earlier.

MOORE'S EARLY. Black. Bunch large, berry very large; equal to Concord in productiveness and quality but sweeter and 10 days earlier.

HERBERT. Black. Bunch and berry very large; flesh sweet, tender and of good quality. Early, hardy and productive; one of the best.

Green Mountain Grapes.

Pink or Red Grapes

The Caco (Catawba Concord) Grape

The most delicious of all red Grapes whether hardy or exotic, says the originator. A perfectly hardy Grape that has been pronounced by America's greatest experts to equal in high quality and melting texture the finest Grape grown under glass. In appearance the most beautiful of all hardy Grapes. Berry very large, bright wine red; bunch of large size, compact and of good form. Ripens earlier than Concord, and is so rich in sugar it is fit for use two weeks before it is ripe. When one considers the price of the greenhouse products and realizes that the wonderful Caco can be grown in the back yard almost without attention, the force of the above statement is apparent.

LUCILE. A dark red Grape that is sweet and of very best quality; in vigor, hardiness, and productiveness it is surpassed by none. Its beauty always sells it.

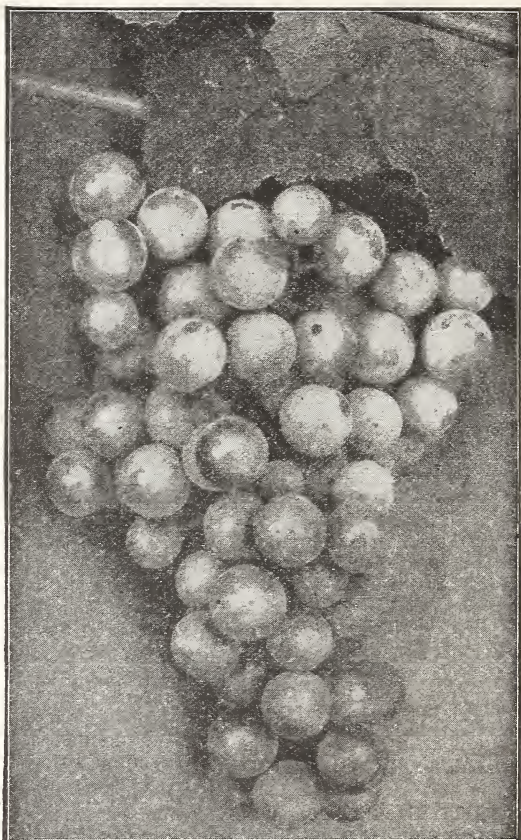

DELAWARE. The standard of excellence. Bunch and berry medium, compact, flesh juicy, very sweet and refreshing. Ripens before Concord. Vines hardy and productive.

White Grapes

GREEN MOUNTAIN. An extra early grape; skin very thin, tender and sweet; contains only one or two seeds; superb quality. See inside back cover page.

MOORE'S DIAMOND. Bunch and berry large; quality extra fine; strong, healthy grower; very hardy, productive; fine for home or market.

NIAGARA. Very valuable for both garden and vineyard; bunch and berry large; skin thin; flesh tender and sweet.

Caco Grapes.

POCKLINGTON. Beautiful golden color; bunch medium to large; berry large; flesh juicy, and of exceptionally fine flavor. Very hardy and productive.

BRADLEY'S QUALITY IS KNOWN THE WORLD OVER.
EVERYTHING IS SHIPPED FROM OUR NURSERY PREPAID TO YOUR DOOR.

New American Mulberries.

Everbearing Mulberries

Everbearing Mulberries are very rapid growers and come into bearing at two and three years from planting; then for months they continue to produce large quantities of fruit good to eat and fine for poultry.

NEW AMERICAN. Largest of all the Mulberries; bears heavy crops at 3 years old. Fruit jet black and excellent quality. Tree a rapid grower, handsome for the park or lawn; they bear fruit continuously from May to August. Price, 4 to 6 foot trees, \$1.00 each; 3 for \$2.50, delivered.

DOWNING EVERBEARING. The beauty and handsome shape of this as a lawn or park tree is quite enough to recommend it but in addition it yields an abundant supply of its large refreshing berries for about 3 months. No raiser of chickens can afford to be without them even if they cost \$5 a tree. Price, 4 to 6 foot trees, \$1.00 each; 3 for \$2.50, delivered.

Rhubarb or Pie Plant

This deserves to be ranked among the best early vegetables of the garden. Scarcely has the grass begun to grow when your table can be supplied with this earliest of all vegetables. Excellent for sauce and pies, continues long in use and is valuable for canning for winter use. Should be in every garden or lot as you get more value for your money from Rhubarb than from any other vegetable grown.

NILES GIANT RHUBARB.

New. Originated in California. The stalks are very large, tender, crisp, and very delicious. It is a very rapid grower and very early; it has deep red stalks which give the sauce when cooked a fine light red color. This variety of Rhubarb is so sweet that it needs but very little sugar; do away with the old expensive sour varieties and plant the Niles Giant. This is a very promising variety which succeeds in all climates and in all soils and we want every person to plant some of each of the three varieties.

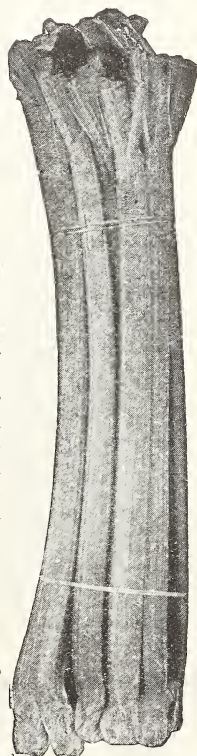

WAGONER'S GIANT RHUBARB.

This wonderful new variety is creating quite a sensation all over the country, everybody wanting some of this variety; all that have tried it want more. Stalks will average 8 to 12 ounces each. It is remarkably early, bearing large stems within five months from planting of the seed; and grows nearly the entire year when the frost is out of the ground. The stems are so tender that they do not need peeling.

Price of good, strong 2-yr.-old Rhubarb, 3 for 50c; 10 for \$1.00; 100 for \$6.00, delivered.

BURBANK'S GIANT CRIMSON.

This is one of the greatest and most valuable vegetables we have ever offered. It is the earliest, tenderest, sweetest and best of all rhubarbs; fit for use in early spring, summer and all fall, while the common or sour sorts are fit for use only a few weeks in the spring. As fast as stalks are pulled new ones take their places. Scarcely has the frost disappeared until your table is supplied with this delicious, refreshing and healthful article of food which is so much desired and appreciated. The stalks are twice the size of the ordinary kind, and of a bright crimson color, very tender, crisp, and of mild delightful flavor; the skin is so tender it does not have to be removed when cooking and the sauce has a deep crimson color. Stalks will average 18 to 24 inches long, broad, thick, and solid; stalks will weigh on an average $\frac{1}{2}$ pound each and often weigh a full pound. Enormously productive, brings high prices and is a great money-maker and in great demand.

Burbank's Giant Crimson Rhubarb.

RHUBARB COLLECTION

15 roots in all, making one of the finest Rhubarb Collections that could be had at any price and will make plenty of fresh stalks all summer for any family. Five strong roots each of the three varieties, postpaid, for **\$1.50**

Asparagus

No home garden is complete, and no housewife has justice done her unless provided with a bed of this excellent and most wholesome vegetable. What is more healthful or more appetizing than a dish of Asparagus, coming as it does in early spring, when the appetite is craving something of this sort? One of the earliest vegetables. It is most beneficial in bladder and kidney troubles, very easily digested and very highly recommended by all physicians. When eaten freely it tones up the system, purifies the blood, drives away malaria and saves many a doctor's bill. A bed once established will give abundant supply for a generation; 200 to 300 roots will produce enough for an ordinary family, but 500 is better. You can cut it every day for months and it will come as fast as cut; easily grown anywhere and everywhere in the corner of the back yard, garden or along the fence or in any vacant spot. Every home should have its Asparagus.

ASPARAGUS—A great Money Crop.

More than \$500,000 worth of Asparagus is shipped from Southern Illinois every spring. Great fortunes are being made here growing this early vegetable. It is no uncommon thing for the first shipments of Asparagus to sell for \$12.00 to \$20.00 per bushel or at the rate of from \$300 to \$500 an acre. There is always a great demand for fine large Asparagus in every home market. Why not grow Asparagus and supply your local markets? Free cultural instructions furnished with each order for Asparagus when requested.

MARY WASHINGTON. There is no variety of Asparagus as good as the Washington or near as good as the Mary. The Mary Washington is a descendent of the Martha, however, it is the greatest find in the history of Asparagus breeding. It is earlier, produces more, has big, fat stalks; possesses the highest rust resistance and will net a great deal more money per acre. Mary is recognized as the best and we are pleased to announce that we can now offer you select roots, grown from the seed of this superior Asparagus, produced from a fine field of Mary Washington. This is the perfect Asparagus and we want you to try it. **Price, 2-yr., \$1.50 per doz.; 100 for \$4.00; 500 for \$15.00; 1000 for \$25.00, delivered.**

MARTHA WASHINGTON. A New Rust-resistant Asparagus. This new pedigreed rust resistant variety was bred up by the United States Bureau of Plant Industry co-operating with the Massachusetts Agricultural Experimental Station covering a period of 14 years. The name Washington was applied because the original or first acceptable rust proof male plant was given that name. Stalks extra large in size, purple color, very tender, crisp, and extra fine flavored. Grows very fast and comes up thick on the rows; making it the most productive variety in existence. The heads stay very compact, solid and always bring a premium over any other variety. We have reduced the price so they will be in reach of all. We want every lover of fine delicious vegetables to try this wonderful well tested variety. **Price, strong 2-year-old roots, doz., 75c; 100, \$2.00; 500 for \$7.50; 1000 for \$14.00. 1-yr.-old roots, doz., 50c; 100, \$1.30; 500 for \$5.00; 1000 for \$9.00, prepaid. Write for price on large lots.**

NEW PERFECTION. This standard and popular variety is planted here in Southern Illinois very extensively. This is a great money-maker and at 3 years old has netted the growers \$500 an acre in 5 to 10 acre fields with ordinary

Martha Washington

cultivation. In short it has all the qualities demanded for the market and will prove itself to everyone who grows it to be true to its name—Perfection. It is deliciously tender, extra large, very early, uniform, prolific, crisp and deep purple. **Price, strong, 2-year-old roots, doz., 50c; 100, \$1.50; 1000, \$9.00, delivered.**

Upper Alton, Ill.
Gentlemen:—Have you asparagus yet? We had such good success with the ones we got from you before, we would like to have 5000 more. Will send our order just as soon as we hear from you. Thanking you for past favors, we remain as ever, **FREDERICK BROS.**

BARBERRY - The Ideal All-Year Hedge

Absolutely Hardy Any Place In America

When Winter Comes

and leaves your lawn and garden more desolate each week. If you have a Barberry hedge, it will supply that touch of brightness throughout the long, dark Winter months, when it will be so much appreciated. The branches are loaded with scarlet berries which stay on all Winter. The hedge that never grows bare. In the early Spring it brings the robins to your door to feast on the berries, before the worms are above the ground. Wherever you plant Barberry that spot will be brightened by rich, green foliage all Summer, brilliant, gorgeous colors in the Autumn, clusters of sparkling red berries in the Winter, in short Beauty, itself, will there abide throughout the year.

Planting of Barberry, Blue Spruce and Pyramidal Arbor-Vitae.

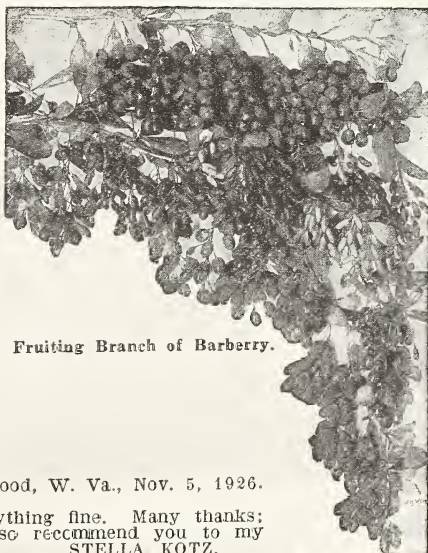

of green throughout the Summer, changing to orange and scarlet in Autumn. It is dwarf growing, uniformly bushy and rounded in form, can be pruned to any shape, or makes a very attractive hedge when left unpruned. When not pruned it grows to a height of about three feet. The branches are curved gracefully and make a very dense, thick, impassable low hedge. It makes an excellent filler for shrubbery groups, and a very attractive foundation screen.

Planting a Barberry hedge is making an investment, it adds actual money value to your property, and is permanent, for once planted very little attention is required, and it grows more beautiful each year, the first cost is the only cost. Where in the wide world will you find anything half as attractive as a graceful Barberry hedge, around the border of your lawn, and along your driveway? Our Barberry is guaranteed to be rust-proof. Strong, bushy, well rooted plants 12 to 18 inches high, 25c each; 10 for \$2.00; \$14.00 per 100. Price of extra large select specimens three years old, two to three foot plants for single or foundation planting, 50c each; \$5.00 per dozen.

ALL PRICES INCLUDE TRANSPORTATION CHARGES TO YOUR NEAREST STATION.

Our Improved Barberry truly makes the ideal hedge, its absolute hardiness makes it adaptable in the far North, where most other hedges Winter kill. Its long, deep growing vigorous root system enables it to withstand the extreme hot, dry weather of the South. It is in fact a universal plant, guaranteed to thrive any place in America.

The Barberry is a beautiful plant with drooping branches, spoon-shaped leaves, foliage a brilliant shade

Fruiting Branch of Barberry.

Benwood, W. Va., Nov. 5, 1926.

Dear Sirs,—

Received your plants in number one condition. Everything fine. Many thanks; I certainly will remember you the next time. Will also recommend you to my neighbors. Many thanks.

STELLA KOTZ.

Hedge or Living Fence

Grow a perfect hedge as quick as a hill of beans. Yes, just as quick. Plant this Spring and before July, there, as if by magic, stands your hedge. Three months of growing makes it instead of three years. With more time the hedge can be grown to any height up to 10 feet, if desired as a windbreak, to give privacy to back yards, etc. Most hedges are thin along the bottom; ours are as solid as a brick wall.

A small amount of money invested in a beautiful hedge will add more value to a country or town home property, dollar for dollar, than any other similar investment without exception. A hedge planted about the border of a lawn will transform a heretofore bare looking spot into a place of beauty; and you can keep it low or let it grow high, as a screen. City or town lots may be divided by hedging with fine effect. It may be used in dozens of different ways, which suggest themselves to the property owner. A hedge is easily set, a little care will keep it in perfect condition. California Privet for the South, and Amoor River Privet for the North.

Notice. California Privet should not be planted north of Kentucky; if you live north of this plant Amoor River north.

The Hedge for the Far North

Amoor River North Privet. This is the only Privet that can be successfully grown in the extreme Northern sections. Is similar to the California Privet in growth and habits, but is extremely hardy and will stand the coldest of weather uninjured. We highly recommend this variety of Privet for the extreme cold climates. It is a fine upright grower with lustrous dark green foliage, nearly an evergreen, transplants easily, grows quickly, making a hedge the first year, will succeed in almost any soil. To add to its attractiveness it is covered with beautiful white flowers in June and July, followed with black berries. Branches close to the ground and forms a very dense hedge. Plant same as California Privet. See instructions below.

Strong plants, well branched, 12 to 18 in., 10 for \$1.20; 100 for \$7.00.

Extra heavy three-year-old plants over 30 inches high with four or more branches making a hedge as soon as planted. 10 for \$2.50; 100 for \$15.00, prepaid.

California Privet

(See center color page.)

One of the leading hedge plants and undoubtedly the largest planted of them all; its foliage produces abundantly the deepest, richest green, almost an evergreen; does not shed its foliage until late Winter and then only in an exposed

position. Very hardy, easily and quickly pruned, you may shape it in any position desired by trimming. They should be planted 1 1/2 inches deeper than they stood in the nursery row; where you set it dig about 12 inches deep and 12 inches wide, use some stable manure at the roots (do not use any commercial fertilizer), set the plants 6 inches apart in the row, dip the roots in water before planting; after plants are set, cut them down to 4 inches from the surface of the ground; this will cause a thick new growth to start, and is very essential for a beautiful hedge; do not cut back again until they have made 10 inches of new growth; when cutting each time allow about 1 to 2 inches above where it was cut before until you have the height desired. After planting, spread barnyard manure at surface of ground; keep free from weeds the first two years, by this time it will get its start, then Nature will do the rest. Did you ever realize what an admirable and luxuriant Privet hedge you could acquire at a very small cost, and how much it would add to the value of your property? To find the exact number wanted, measure the space where it is to be planted and multiply the number of feet by two, this will give the exact number. Our Privet is strictly first class, well branched and heavy rooted. Set in any month that the soil is not frozen, except June, July and August.

18 to 24 inches, 10 for 85c; 100 for \$5.50; 1000 for \$50.00.

5 to 30 sold at the 10 rate; 30 to 300 sold at the 100 rate; 300 or more sold at the 1000 rate.

Extra heavy three-year-old plants over 30 inches high with four or more branches, making a hedge as soon as planted. 10 for \$1.75; 100 for \$12.00, prepaid.

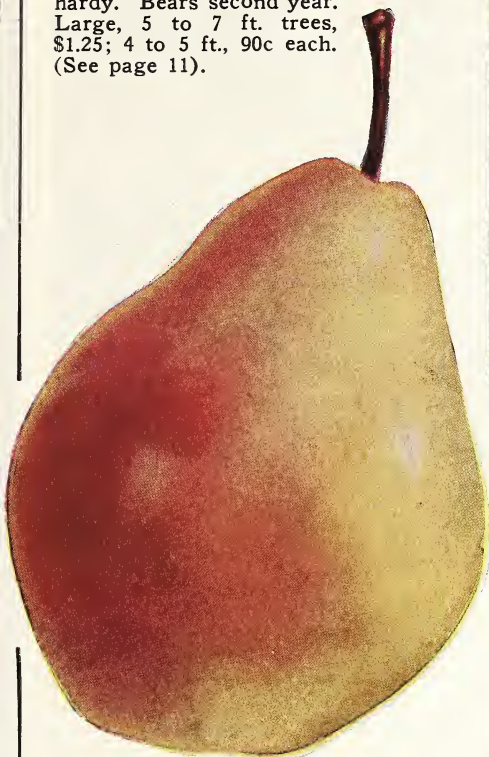

Amoor River Privet Hedge.

ALL PRICES INCLUDE TRANSPORTATION CHARGES TO YOUR NEAREST STATION.

Lincoln Pear

Blight proof. Best flavored for eating and preserving; larger and better than Bartlett. Absolutely hardy. Bears second year. Large, 5 to 7 ft. trees, \$1.25; 4 to 5 ft., 90c each. (See page 11).

Above is a planting of *Catalpa Bungei*, California Privet Hedge and *Hydrangea P. G.* It cost but little to make this one of the most beautiful homes in the city. (See pages 17, 24, 28).

Superb Apricot

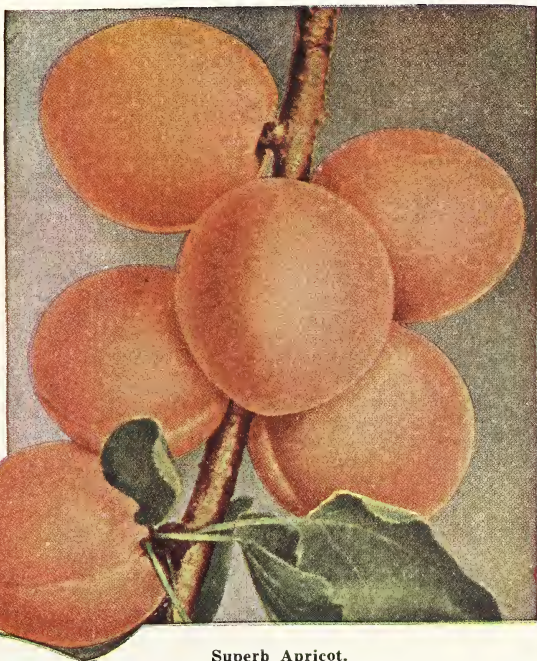

Hardy, any place peaches will grow; fruit of finest quality, bears the second year. Large, 4 to 5 ft. trees, 80c each, delivered. (See page 15).

New Standard Prune

This grand variety is extremely hardy, can be successfully grown in any state; fruit very delicious, bear very young. 5 to 6 ft. trees, \$2.00 each, prepaid. (See page 14).

New
Standard
Prune.

Superb Apricot.

1. Priscilla.
2. Duchess of Wellington.
3. Meteor.

See page 32.

Rose Bargain

One strong 2-year-old bush each above three grand new Roses for only \$2.00, prepaid.

Hydrangea P. G.

This most beautiful shrub is very valuable for foundation planting, relieves the bareness of the entire surroundings and provides an abundance of beautiful flowers. Extra strong, 2-yr. plants, 60c each, delivered. (See page 28).

Spirea Van Houttei

The finest variety in the collection, in May and June it is covered with a mass of beautiful flowers. Very valuable for foundation planting. Strong, 18 to 24 in. plants, 25c; extra heavy selected specimens, 3 to 4 ft., 60c each. (See page 27).

Butterfly Bush

This beautiful shrub blossoms the entire Summer the same year planted. Hardy any place in the United States. Strong, 2-year-old plants, 50c each.

Black Hills Spruce

This very ornamental Spruce is hardy any place in America; nothing will add more to the attractiveness of your home, especially during the Winter. 2 to 3 ft. trees balled and burlapped, \$3.00 each, delivered. (See page 30).

Butterfly Bush—Buddleia.

Black Hills Spruce.

Pyramidal Arbor-Vitae.

Pyramidal Arbor Vitae

This very beautiful deep green tree is excellent for entrance markers; hardy any place. 2 to 3 ft. trees, balled and burlapped, \$4.00 each, delivered. (See page 30).

Bradley's Beauty Rose

The most beautiful Rose; blooms from early Spring to freezing weather; has long stems; hardy any place. Strong, 2-yr. bushes, \$1.00 each. (See page 32).

We give
one bush
free with
every order for
\$2.00 or more.

Mastodon

The world's greatest everbearing Strawberry; bears a profitable crop same season planted. The most successful commercial everbearer. We consider the Mastodon by far the best everbearer and recommend that our customers plant some this year. 25 plants, \$2.50; 100 for \$9.00, prepaid. (See page 40).

Honeysweet Black Raspberries

The greatest commercial berry; heavy yielder; sure bearer; extra large; good shipper; brings top prices. 3 for 50c; 12 for \$1.00; 100 for \$5.50. (See page 43).

La France Red Raspberry

A genuine everbearer, will absolutely produce ripe, delicious fruit during the entire Spring, Summer and Fall. Considered by most large growers the most profitable commercial red Raspberry. 3

strong plants, 50c; 12 for \$1.25; 100 for \$10.00.

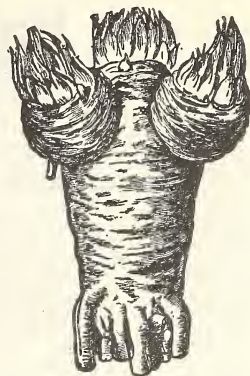

(See page 42.)

Horseradish Sets

It is as easy to grow as a weed, and every good housewife knows its great value in the making of sauces and seasonings. Once used in pickles it will never be left out. Horseradish sauce is one of the chief appetizers of the golden old-time Southern cuisine. It is also one of the few sauces or condiments that is pronounced by the best authority to be perfectly wholesome. A dozen plants will supply a large family for a lifetime, and it grows and multiplies very fast.

NEW BOHEMIAN. Roots very large, quick grower, very productive, producing about twice as much as the common sort. Flesh pure white, tender and free from stringiness. Three or four tons per acre can be produced easily. Fine sets, 50c per doz.; \$1.50 per 100; \$12.00 per 1000, delivered.

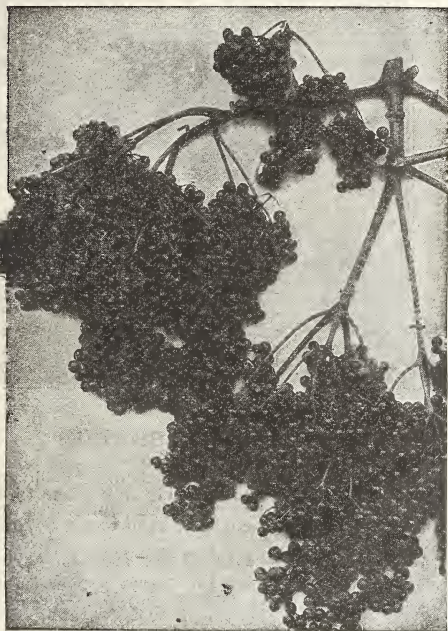

Adams' Improved Elderberry

A new fruit perfected from the common elderberry. The small white flowers come in large handsome clusters; very fragrant, handsome, opening in early summer when other flowers are scarce. Fruit black, very profuse, ripening in August. Grows 6 to 8 feet high. Berries are highly esteemed for pies, sauce, cordials and highly flavored wine, which is very refreshing. Everybody likes these improved elderberries; they are easy to grow and do well everywhere. Price, 50c each; 3 for \$1.00; 6 for \$1.75, delivered.

Paw Paws

(Winter Banana)

A small handsome tree with large purple flowers which are very fragrant, and large dark green foliage which makes it a handsome tree for the park or lawn. The large yellow fruit has the flavor and shape of the banana and is very delicious. Tree ornamental, hardy and productive; should be planted more extensively. First class trees, \$1.00 each; 3 for \$2.50, delivered.

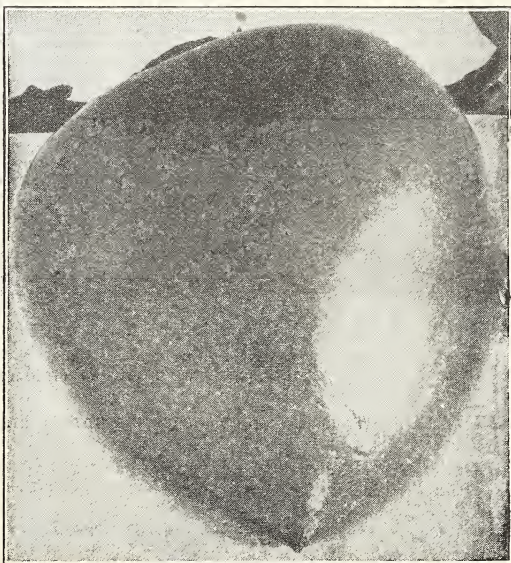

Adams' Improved Elderberry.

Persimmons

Persimmons are a great luxury to a large per cent of people, in which they can seldom indulge, but these large, delicious, improved varieties are a great improvement over the old native, pungent wild ones.

EGYPTIAN. Is very large, broadly oblong, pointed; skin light yellow, changing to deep yellow when at full maturity; flesh yellow; quality very fine, delicious, firm, juicy and good. Nothing tastes better in the Fall of the year than a well ripened Persimmon; trees bear at 2 years and are very hardy and productive. 4 to 5 ft. trees, \$1.00 each, or 3 for \$2.75, delivered.

TANE-NASHI. Large to very large, roundish conical, very smooth; diameter 3 1/4 inches longitudinally and 3 1/2 inches transversely; skin light yellow, changing to bright red; flesh yellow, quality extra fine; perhaps the most highly esteemed of all; quality and shape combine to make this the most desirable market variety. Price, 3 to 4 ft. trees, \$1.00 each; 3 for \$2.75, delivered.

Egyptian Persimmon.

"ONE TODAY IS WORTH TWO TOMORROWS." BETTER SEND US YOUR ORDER TODAY WHILE OUR STOCKS ARE COMPLETE.

Hardy Flowering Shrubs

They are absolutely hardy and once planted, last indefinitely, increasing in size and beauty year after year and lasting a lifetime. They supply that something which is lacking in every yard where hardy shrubbery is not planted. We recommend a liberal planting of this class of plants; they increase the value of the property, make the home more attractive—life worth living—giving satisfaction and contentment that nothing else can.

HIGH BUSH CRANBERRY

A sturdy, vigorous bush, with soft white flowers that resemble the Snowball very much. This ornamental shrub is very beautiful in the Fall of the year when it is loaded with clusters of orange-red berries that are retained until late in the Winter. When turning from the yellow to red, these berries are used by many housewives for jelly, and it has a delicious flavor; then a few days later when they are a good red color, they make lovely jam and butter. This is another shrub that will do well on the north side of buildings where little sunlight reaches. Very hardy. Landscape men usually have a place for the High Bush Cranberry in their plans for the home grounds. 3-yr., strong plants, \$1.50 each.

SNOWBALL

COMMON. A well known favorite shrub producing its snowy white sterile flowers in large balls in June. 50c each.

JAPAN. An erect, compact shrub, blooming in June; completely covered with large balls of flowers that are as white as snow, foliage is dark green. We recommend this most highly. \$1.00 each.

Lilac, Japonica.

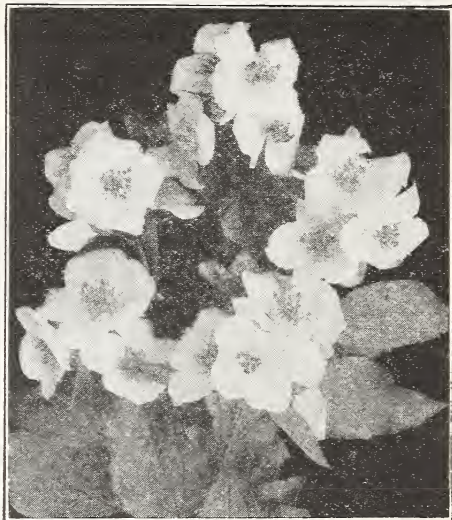

hood. Their fragrance should bless every home and fasten memory to the scene we knew as children. 40c each; 10 for \$3.50.

WHITE. Same as the above except the flowers are white. Same price.

JAPONICA (Japan Tree). Largest Lilac known; produces large panicles of creamy white; very fragrant. 2 to 3 ft., 75c.

MOCK ORANGE

Of vigorous habit, very hardy, with large, handsome foliage and beautiful white flowers produced in great profusion. They merit a place in every collection of shrubbery. 18 to 24 inches, each, 70c; 10 for \$6.00. 2 to 3 ft., each, 80c; 10 for \$7.00.

Mock Orange.

ALTHEA OR ROSE OF SHARON

Altheas are fine, free-growing, flowering shrubs and are easy to cultivate. Very desirable on account of blooming in August and September, when scarcely any other tree or shrub is in blossom. We have them in white, red, pink and purple. 2 to 3 ft., 50c each; 1 of each color, \$1.75.

FORSYTHIA - GOLDEN BELL

Blooms early in Spring before the leaves appear. Flowers golden yellow, often with twisted petals. One of the best hardy early flowering shrubs. 2 to 3 ft., 40c; 10 for \$3.50.

BUTTERFLY BUSH

This beautiful shrub matures rapidly and produces beautiful lilac-colored flowers in profusion. Blossoms the entire Summer; splendid for cutting. Price, strong 2-yr. plants, 50c each.

LILAC PURPLE. Old-fashioned sweet-scented purple. Lilac of our childhood.

Japan Snowball.

FLOWERING SHRUBS—Con.

SPIREA

Comprising a large family of low shrubs; very hardy, of easiest culture; very satisfactory ornamental shrub.

ANTHONY WATERER.

(See illustration outside front cover page). Has large heads of dark crimson flowers, blooming all Summer. 15 to 18 in., 60c; 10 for \$5.50. 18 to 24 in. heavy, \$1.00 each.

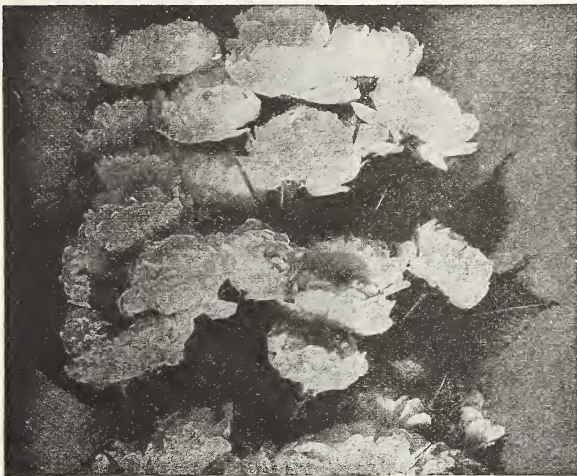

Spirea Anthony Waterer.

BILLIARDI. Produces rose colored flowers in great abundance nearly all Summer long. Should be in every collection of shrubbery. 2 to 3 ft., 30c; 10 for \$2.50.

BRIDAL WREATH. Bush covered with pure white, double, daisy-like flowers in great masses in May and June. 2 to 3 ft., 60c; 10 for \$5.00.

VAN HOUTTEI. White Queen. (Center color page. A well known Spirea, a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white bloom; the foliage hardly showing. It is of a drooping habit, reaching a height of 6 to 8 feet when matured, producing a profusion of white flowers in June. 18 to 24 in., 25c; 10 for \$2.00; 2 to 3 ft., 35c; 10 for \$3.00. Extra heavy selected specimens, 3 to 4 ft., 60c each; 10 for \$5.00.

Bechtel's Flowering Crab

GOLDEN LEAVED ELDER

A handsome variety with golden-yellow foliage, which renders the plants very conspicuous and effective. White flowers. The berries are used for pies, jam and wine. 75c each.

FLOWERING CRAB

BECHTEL'S. One of the very best dwarf ornamental trees, and is exceptionally fine for specimen planting. The delicate pink blossoms, which from a distance look like small roses, are borne in great profusion from the middle to the last of May and their delightful fragrance emphasizes their charm. They are a delight to the whole family, and of late years are being used extensively in cemetery plantings. Very hardy. 3-yr., strong trees. \$1.50 each.

DEUTZIA

PRIDE OF ROCHESTER. Large, double white flowers, produced in great profusion through June. 2 to 3 ft., 30c; 10 for \$2.50.

GRACILIS. A charming variety. Yields a mass of pure white flowers about Decoration Day. 15 to 18 in., 40c; 10 for \$3.50.

Deutzia, Pride of Rochester.

Hydrangea
Arborescens—
Hills of Snow.

TAMARIX

AFRICANA. Strong, slender growing shrub, with feathery foliage and small, delicate pink flowers, borne profusely on graceful, drooping branches which have red bark. 2 to 3 ft., 50c.

GALLICA. Foliage fine and feathery. On long, slender branches that are covered their entire length with bright pink, plume-like flowers. Same price as above.

WEIGELA

CANDIDA. Flowers pure white; produced in great profusion in June; also more or less all Summer. 2 to 3 ft., 40c; 10 for \$3.50.

EVA RATHKE. Flowers brilliant crimson. Very fine blooms all Summer. 2 to 3 ft., 75c; 10 for \$6.50.

CORNUS (Dogwood)

The Shrubby Dogwoods are mainly valuable for the brilliancy of their barks and berries, and the handsome variegations of their foliage. All varieties do well in shade. May be used to advantage in extensive shrub groups where requirement is an expanse of green foliage, the Fall fruits calling a welcome assemblage of birds; and the tangled mass of highly colored twigs enlivening the prevailing somberness of shrubbery in Winter.

SIBIRICA. Grows 6 to 10 feet high, with clusters of fine white flowers, succeeded by a Fall crop of ornamental berries; stems and branches turning to blood red in Winter. 2 to 3 ft., 50c each; \$4.00 per 10.

HYDRANGEA

HARDY HYDRANGEA (Paniculata Grandiflora).

It beats the world; fine shrub growing from 8 to 10 feet high. It is hardy, enduring the severest Winters outdoors without protection. Easily transplanted, not one in a thousand dying. Never fails to bloom the first year planted; blooms in great profusion; flowers as large as the head of a full grown child. It is thus attractive immediately after it is planted; gaining in beauty and grandeur for ten to twenty years if properly pruned. 1-yr., 50c; extra large, 60c. (See illustration center color page.)

TREE HYDRANGEA P. G.

The same as Hydrangea Paniculata Grandiflora, but grown on stems in dwarf tree form. At maturity they stand about five feet high. Most attractive and desirable, making a very picturesque specimen shrub for the lawn, and especially beautiful when covered with the immense panicles of bloom. With well shaped heads, \$2.00 each.

HILLS OF SNOW (Arborescens Sterilis).

Grows 3 to 5 ft. A new variety, much like the above, but commences to bloom in July and lasts until frost; flowers borne on long stems, and changing from pure white to green, a rare variety. Price, 1-yr., 75c; 2-yr., extra large, \$1.00.

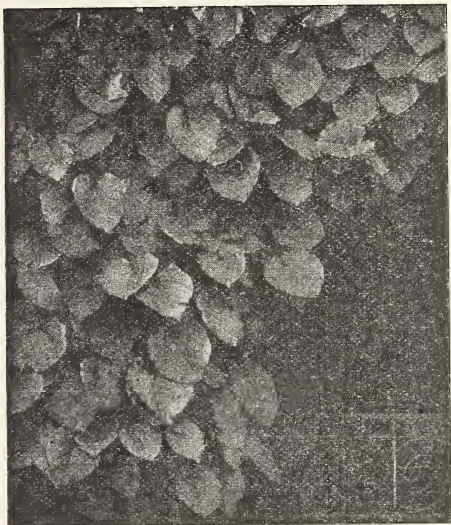

Tree Hydrangea.

Weigela, Eva Rathke.

WE PAY ALL DELIVERY CHARGES.

Hardy Vines and Climbers

Dutchman's Pipe.

Red Coral. Very rapid grower, producing clusters of scarlet trumpet-shaped flowers in great abundance; very pretty and fragrant. 40c; 3 for \$1.00.

DUTCHMAN'S PIPE. An attractive vine of rapid growth. Foliage light green and the yellowish brown flowers are pipe-shaped. 2-yr., \$1.00.

Clematis

Paniculata. A rapid grower and a profuse bloomer; flowers small, white, fragrant, produced in great panicles; very popular. 2-yr., 75c.

Jackmani. Flowers from 4 to 6 inches in diameter; rich purple, with a velvety appearance; blooms continually from July till frost. 2-yr., 75c; 3-yr., \$1.00.

Clematis Jackmani.

Nothing lends such pleasing effect to wall or veranda as the judicious use of vines. The hardy vine is best adapted for covering an unsightly wall or for furnishing shade and ornament to verandas. Hardy vines practically take care of themselves after they are once established and are much more desirable and less trouble than annual or tender varieties.

BOSTON IVY. This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it smoothly with overlapping foliage; giving it the appearance of being shingled with green leaves; quite hardy and very popular. 50c each; 3 for \$1.25.

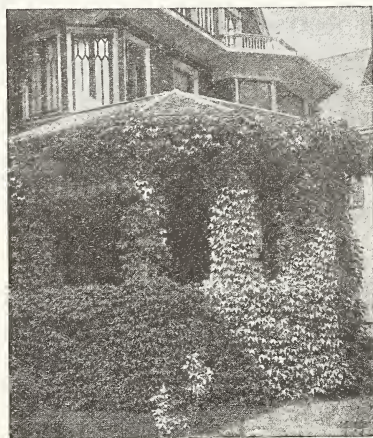

TRUMPET VINE. Grand old favorite, hardy climbing plant, with mammoth trumpet-shaped, scarlet blossoms in August; in bloom all Summer. Fine for covering old stumps, verandas or for growing in single specimens. 50c each; 3 for \$1.25.

VIRGINIA CREEPER (American Ivy or Woodbine). Fine for trellises where a rapid growing vine is needed; with their scarlet, green and mixed foliage they are very attractive. 50c each; 3 for \$1.25.

Sweet Scented Honeysuckles

Heckrotti. Flowers open pure white and change to yellow; very fragrant and floriferous; bloom unceasingly all Summer; leaves remain green all Winter. 40c; 3 for \$1.00.

Halliana. Flowers intensely sweet-scented; hardy and almost evergreen. Constant and most profuse bloomer; flowers buff-yellow passing to white. 40c; 3 for \$1.00.

Boston Ivy.

WISTERIA

Chinese Purple. One of the most elegant and rapid growing of climbing plants. Flowers a beautiful color which bloom in July. 2-yr., 50c.

Chinese Blue. The most elegant and rapid growing of all climbing plants, growing 15 to 20 feet in one season. Has long pendulous clusters of pale blue flowers from May till Fall. 2-yr., 50c.

Chinese White. Similar in all respects to Chinese Blue; flowers a pure white. 2-yr., 75c.

Columbus Junction, Iowa, April 7, 1926.

Dear Sirs: I was surprised when I found the trees on the mail box this morning, looked as fresh as if it had come from the next door neighbor. You have the most complete line of stock I ever saw and you are sure on the square.

OTTO HOFFMAN.

COVER THAT BARE, UNATTRACTIVE PLACE WITH CLIMBERS; YOU WILL BE SURPRISED AT THE DIFFERENCE.

Pyramidal Arbor-Vitae.

more than three feet high and spreads out three feet in diameter. excellent for planting around the house foundation, beds, etc. Each 10 to 12 in. diameter, prepaid\$3.00

PYRAMIDAL ARBOR-VITAE. Almost everyone is familiar with the tall, narrow Pyramidal Arbor-Vitae. The strain we offer is of a deep green color of excellent habit. An excellent tree for entrance markers. It reaches about 15 feet when matured, spreading more than 2 feet at the base. Each 1½ to 2 ft., prepaid\$4.00

Chepachet, R. I., May 3, 1926.
Bradley Brothers.

Gentlemen: The nursery stock received on this day in the finest of condition. I am more than pleased with same, and I appreciate your prompt service, also excellent quality of stock. I have taken great care in setting out and hope everything lives. If at any time I have the occasion, rest assured I will gladly recommend you people for square and fair dealings. Your well satisfied customer.

Yours respectfully,
CHARLES E. WESTCOTT.

Du Bois, Pa., April 6, 1926.
Received my shipment of trees today all in good condition.

LESTER E. BROWN..

Evergreen Trees

Many of our customers who buy their fruit trees, shrubs and other nursery stock from us have written in that they would like also to secure a few Evergreens at the same time. We have, for this reason, made a thorough investigation and have selected five leading hardy varieties of Evergreen trees. These trees have all been twice transplanted and will be dug with earth balls and tied in burlap. This is the only safe method of handling Evergreen trees and insures their arrival in perfect planting condition.

Shipping Season. Shipments will be made between April 15th and May 15th. The season varies a week or two, depending upon the season. Evergreens must be dug fresh from the ground so it will be impossible for us to ship the Evergreens in most cases along with the other nursery stock. They will come in separate shipment.

BLACK HILLS SPRUCE. This choice variety is a native of the Black Hills of South Dakota, where it has been grown under the most severe conditions. For this reason it is one of the most hardy and most dependable trees. The growth is compact, symmetrical and very attractive. Color varies from green to blue tints. 1½ to 2 ft., \$3.00 each, prepaid.

DWARF MOUNTAIN PINE. This is the famous Dwarf Pine used in all high class landscape planting. We are fortunate in obtaining a strain of the true Dwarf plants grown from seed collected from the Swiss Alps. This tree never grows

Black Hills Spruce.

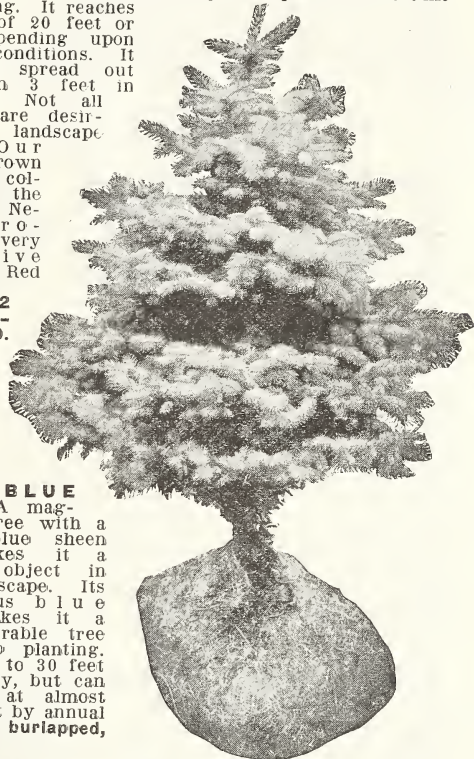

Dwarf Mountain Pine.

Red Cedar.

pruning. Specimens, 1½ to 2 ft. high, \$6.00 each, prepaid.

RED CEDAR. This familiar tree, while it is an old-fashioned, well known favorite occupies first place in demand. This is due to the reliable hardness of the tree itself, changeable color, which is very attractive and compact, uniform growth and the fact that it will survive on very poor soil. It stands trimming and can be shaped into fantastical shapes by anyone if they will spend a little time in trimming. It reaches a height of 20 feet or more, depending upon the soil conditions. It does not spread out more than 3 feet in diameter. Not all varieties are desirable for landscape trees. Our stock, grown from seed collected in the state of Nebraska produces a very attractive strain of Red Cedar. 1½ to 2 ft., prepaid, \$2.50.

COLORADO BLUE SPRUCE. A magnificent tree with a silvery blue sheen that makes it a striking object in any landscape. Its conspicuous blue color makes it a very desirable tree for group planting. Grows 20 to 30 feet at maturity, but can be kept at almost any height by annual balled and burlapped,

Colorado Blue Spruce, Balled and Burlapped for Shipping.

BRADLEY'S QUALITY PEONIES

The Peony is truly the queen of all perennials, rivalling the rose, in form, color and fragrance. They thrive admirably in any soil and may be grown in shady parts of the lawn where other flowering plants refuse to bloom. They deserve their increasing popularity because of their beauty, range of color and form, their extreme hardness, ease of culture and freedom from plant pests and disease. No matter how unsuccessful you have been with other flowers, you can grow fine Peonies to perfection. Our bulbs are grown by experts and under the most favorable conditions, and are guaranteed to give satisfaction.

Bible Grove, Ill., April 13, 1926.

Dear Sirs: I received in good condition the trees I ordered from you. I am well pleased with them. I thank you for the premiums.

MAUD LEWIS.

Peony, Queen of All Perennials.

Our Hardy Roses

**Hardy Garden Roses, Queen of Flowers,
Bloom the First Year Planted.**

All Roses offered in this catalog are strong plants, two years old. We do not consider it good business to offer one-year-old or younger plants which, unless given the very best of care, most always prove disappointing.

Hybrid Teas or Monthly Roses

Again we offer our patrons not only an unusually large quantity of Everblooming Roses, but an assortment of varieties which is, we think, the finest we have ever had the pleasure of offering.

This collection of varieties has been made with endeavor to choose sorts which are not only among the most beautiful, but also hardy. Even so, it is best to give all varieties some protection in Winter. A light covering of strawy manure is all that is necessary; or an equally efficient protection may be obtained by heaping soil, say, eight inches deep about each plant—removing same, of course, in early Spring.

The shock to Everblooming Roses is so great, when taken from the nursery row and planted in the garden that several weeks or even months, are required for them to recuperate. Because of this we grow all our Roses of this class in pots. In shipping these large, sturdy plants, they are taken from the pots in which they are growing and are sent with all their roots and the earth about them undisturbed. When thus shipped and planted in their new homes they continue to grow and flower without check.

SPECIAL NEW VARIETIES OF GREAT MERIT

BRADLEY'S BEAUTY. This is our newest Rose, and we now offer one free to every one of our customers who sends us an order for two dollars or more this season. This Rose is without doubt the most beautiful Rose ever produced. It is a large, full flower with well shaped buds, the color being an attractive, glowing crimson; sweetly scented. A strong grower, making long stems suitable for cutting. We recommend this Rose highly for show purposes as the flowers are firm and hold up well when cut. The long, heavy, pointed buds are perfection, while the open flower, with its huge saucer-shaped petals, is glorious. Its blooms are produced with great profusion from early Spring till freezing weather. No matter how many Roses you have, you have nothing like the Bradley's Beauty. Price of 2-yr.-old size, \$1.00 each. No more than three sold to any one customer.

DUCHESS OF WELLINGTON. Called orange Killarney. Intense saffron-yellow, stained with rich crimson. As the flower develops it becomes deep copper, saffron-yellow. Petals large and of great substance. Free flowering and delightfully fragrant, and without a rival in this class and color. Price, 85c each; 4 for \$3.00.

PRISCILLA. This new Hybrid Tea has been much admired for its pleasing color of shell pink deepening toward the center. Bud long and well shaped. Open flowers, full and double, on long, stiff stems. Foliage handsome glossy green, free from disease. Price, 85c each; 4 for \$3.00.

Bradley's Beauty Roses.

THE BRIDE. The buds are very large and of exquisite form; the petals are of fine texture and substance, and the full flower is very double, measuring from three and one-half to four inches in diameter. The color is a delicate creamy-white. The blooms can be cut with long stems and will last in a fresh state after being cut longer than any known variety. Price, 85c each; 4 for \$3.00.

METEOR. This splendid Rose is one of the brightest colored of all, considered among the very best for bedding and general planting. The color is a rich velvety crimson, exceedingly bright and striking and the flowers are large and regular, fully double and borne on nice, long stems. It is a quick and constant bloomer and quite fragrant. Never fails to please. Price, 85c each; 4 for \$3.00.

One strong two-year bush each of the five above grand new Roses for only \$3.50, prepaid.

Bacon, N. Y., April 29, 1926.

Dear Sirs: Received your shipment of goods O. K. the 29th, finding them as described.

Yours sincerely,

E. W. HENDERSON.

HYBRID TEAS OR MONTHLY ROSES—Continued

FLORENCE FORRESTER. In bud it is white, tinted yellow, expanding to a beautiful snow white flower; fine fragrance.

GRUSS AN TEPLITZ. Brightest scarlet-crimson; satiny texture; of very free-flowering, vigorous habit.

HELEN GOULD. Large red flowers; free bloomer; strong grower; constantly in bloom.

HOOSIER BEAUTY. A beautiful velvety red Rose, the grandeur and beauty of which no description can give the faintest idea. Strong grower and always in bloom.

IRISH FIREFLAME. Has long, pointed buds, expanding to a large flower of a fiery orange-crimson, yellow shaded, venated and tinted. A wonderful color combination.

KAISERIN AUGUSTA VICTORIA. The greatest white Rose in existence; strong, sturdy grower; free bloomer, blooming from early Spring till late Fall.

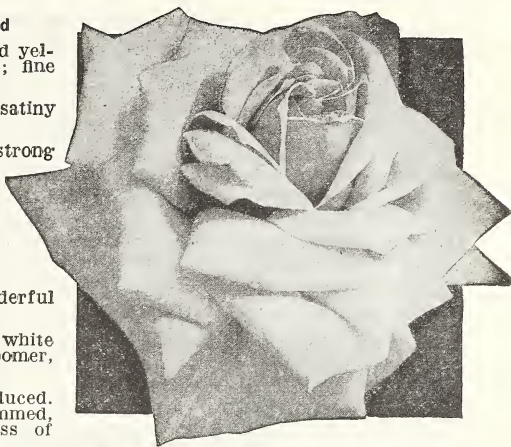

LOS ANGELES. The finest pink Rose ever introduced. Vigorous grower; always in flower with long-stemmed, luminous, flame pink colored blooms. In richness of fragrance it surpasses the Marechal Niel.

LADY ASHTOWN. Pale yellow Rose of great beauty; profuse bloomer of good substance.

LADY PLYMOUTH. Rich creamy bud, bordering on yellow; opening to a splendid flower.

GEO. DICKSON (Black Beauty). Color a velvety black-crimson, full and very large. We have had blooms all Summer, 5 inches across. Awarded Gold Medal of National Rose Society of England.

KING GEORGE V. Color rich, blackish crimson, deep velvety and brilliant. Very free flowering and perpetual. Awarded the Gold Medal of the Festival of Empire, Crystal Palace, London.

Lady Ursula.

FRAU KARL DRUSCHKI (White American Beauty). Pure white; large, long buds; perfectly double, often measuring 5 inches across. A strong, hardy, thrifty grower, beginning to bloom in June.

LA FRANCE. Bright pink; very large, double and of excellent form; flowers continually through the season.

MRS. AARON WARD. Distinct Indian yellow, with lighter shade on the edges of petals. Free bloomer.

OPHELIA. Opening to a beautiful salmon flesh, shaded with Rose; long buds on long stems. A wonderful Rose.

RADIANCE. Beautiful carmine Rose, flushed with copper; large, round flowers.

RED RADIANCE. Constantly in bloom from early Spring until freezing; extra large; strong, hardy grower; a great favorite.

SUNBURST. Large, fine yellow; long pointed buds, full and double; constant bloomer; good grower and hardy.

LADY URSULA. A magnificent Rose of vigorous, erect growth; exceedingly free blooming during the entire Summer and Autumn. The flowers, produced on every shoot, are very large, full and of great substance and perfect form, with high center, from which the petals gracefully reflex; in color a delightful tone of flesh pink, distinct from all others; delicately scented.

PRICE

All varieties on this page, strong, two-year-old bushes, 60c each; \$5.50 per doz., prepaid.

Frau Karl Druschki.

Norristown, Pa., April 27, 1926.
I received the nursery stock in excellent condition. I want to say that I appreciate it very much, the trees are unusually good and I feel that I can give you the highest recommendation, also a larger order for next Spring. Thanking you very much, I am,

Very truly,
MRS. EARL PENNINGTON.

HYBRID TEAS OR MONTHLY ROSES—Continued

AMERICAN LEGION. This wonderful new Rose is named in honor of the World's War heroes. Beautiful, glowing crimson-scarlet color. Large, full, well-shaped flowers sweetly scented. Constant bloomer which is sure to please all who grow it.

ADMIRAL WARD. Deep crimson-red, overlaid black; profuse bloomer. Strong grower with fine, large, lustrous foliage.

ANTOINE RIVOIRE. Rosy flesh on yellow ground, shaded with carmine; a splendid variety.

BESSIE BROWN. Creamy white; flowers very large and full; highly perfumed.

BRILLIANT. Described as being the brightest scarlet produced in a Rose. Color is intense and fast, not turning to purple.

BRITISH QUEEN. Of the purest ivory white, having the substance of Druschki and the shape of Maman Cochet. Blooms freely and continually.

CARDINAL. Pleasing, fragrant, red Rose, robust grower with large blooms.

COLUMBIA. A big, pink, open flower, rose measuring 6 inches across; called a giant pink everblooming Rose.

DAD STERLING. Large blooms of fine form; yellow, with warm, deep center; delicate scent; flowers freely.

EDWARD MAWLEY. Velvety crimson with large, thick petals and a high center; carried on good stems.

Hardy Hybrid Perpetual Roses

The Hardy Perpetual, or June Roses as they are commonly known, are the hardiest of all Roses known, standing the Winters in the coldest places in the United States. After once planted they require little or no attention, and increase in size and beauty every year.

J. B. Clark,

VICK'S CAPRICE. Cup-shaped blooms, with thick petals; clear shell-pink; striped white and red or variegated.

Book of instructions sent free if you want it.

GENERAL JACQUEMINOT. Bright, shining crimson, rich and velvety; exceedingly brilliant, handsome and fragrant. Useful for all purposes.

AMERICAN BEAUTY. Rich, rosy crimson, exquisitely shaded; a superb Rose.

ANNA DE DIESBACH. Beautiful carmine; very large and fragrant; pointed buds; one of the best.

HUGH DICKSON. Intense brilliant crimson, shaded scarlet; large, full and high pointed center; very fragrant; the best in color of its class.

J. B. CLARK. Very deep scarlet; heavily shaded blackish crimson; very vigorous.

LOUIS VAN HOUTTE. Fiery red-crimson; large full flower; very beautiful and free blooming.

MADAME PLANTIER. Pure white flowers, produced in great abundance early in the season; very double.

MAGNA CHARTA. Bright Rose; very large, sweet-scented and of fine texture; a vigorous grower and profuse bloomer. Very hardy.

PAUL NEYRON. Largest of all Roses; deep rose; full and double; fine foliage.

PRINCE CAMILLE DE ROHAN. Deep, velvety crimson. A large flower and profuse bloomer of beautiful color.

PRICE

All varieties on this page, strong, two-year bushes, 60c each; \$5.50 per dozen, prepaid.

YOU KNOW EXACTLY WHAT YOUR STOCK IS GOING TO COST YOU DELIVERED.

New Hardy Climbing Roses

These Varieties Live Forever, Are Perfectly Hardy, and Will Stand the Winters Anywhere in the United States

NEVER TOO MANY ROSES. When the last word is said of all other flowers; there cannot be too much said of the Rose. The plants may be grown either on trellises or pergolas or used in covering banks.

AMERICAN BEAUTY (Climbing). A very strong vigorous grower; will grow anywhere. The early fragrant flowers are a deep, rosy carmine-crimson.

AMERICAN PILLAR. A fine shade of pink; with clear white eye; flowers large, often 3 to 4 inches across and produced in great clusters.

BALTIMORE BELLE. Pale blush, variegated carmine; rose and white; flowers in large clusters.

CHRISTINE WRIGHT. Wild Rose pink; large and double; vigorous, free grower.

CRIMSON RAMBLER. Crimson; a profuse bloomer in large clusters.

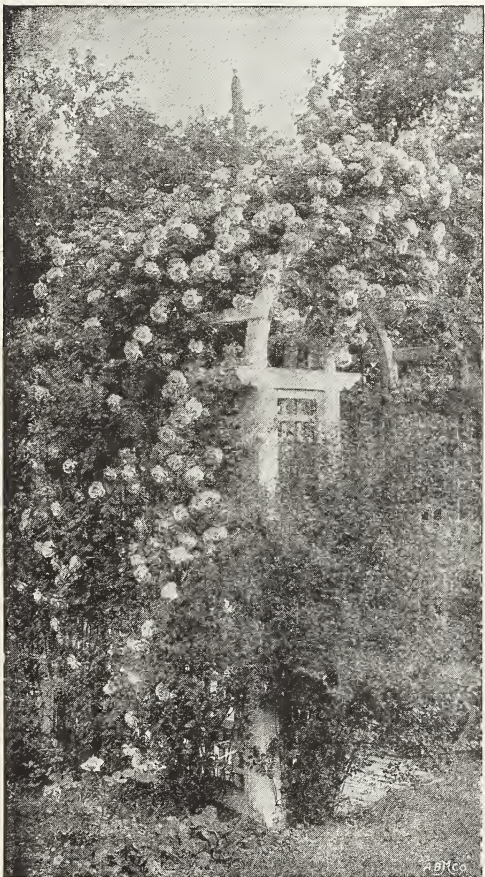

DR. W. VAN FLEET. This is indeed a wonderful Rose, soft, shell pink; blooms very large, full and high and measure 4 inches in diameter, borne on long sturdy stems. Foliage a fresh green color, gradually changing to a bronzy hue. Extremely hardy.

DOROTHY PERKINS. Soft light pink; flowers profusely in large clusters; very lasting. Strong, rank, hardy grower.

EXCELSA (Red Dorothy Perkins). Intense crimson, with lighter edges; fine foliage. Strong, rank grower and hardy.

Dr. W. Van Fleet.

Climbing American Beauty.

FLOWER OF FAIRFIELD. An everblooming variety of Crimson Rambler. Color and habit are identical with that variety, except it is an everbloomer.

HIAWATHA. Brilliant scarlet, flowering in large clusters; most brilliant and effective; one of the very finest.

SHOWER OF GOLD. Very fine, coppery gold; pretty buds and very floriferous; glossy foliage.

SILVER MOON. Immense flowers, measuring on an average 4 inches in diameter; semi-double, of pure waxy whiteness. Most profuse bloomer of all climbers; has large dark foliage.

THOUSAND BEAUTIES. Flowers pink, rosy carmine, showing many different shades of coloring. Clusters very large; flowers large.

WHITE MEMORIAL. Pure white flowers in pyramidal clusters; beautiful foliage. A splendid Rose for growing in the cemetery, allowing it to spread over the ground, or trained to a bush.

WHITE DOROTHY PERKINS. Same as Dorothy Perkins except the color is white.

Price, all varieties on this page, except Illinois Rose, is 60c each; \$5.50 per doz., prepaid. All strong, two-year bushes.

THE ILLINOIS ROSE

The Hardest, Prettiest and Most Charming Rose Ever Grown.

This wonderful Rose is the only native climbing Rose in America. Perfectly hardy in every state, regardless of climate and location. The Illinois Rose is an ideal climber to use on porches or trellises, and it can also be kept trimmed into a beautiful hedge. The blossoms are single and borne in abundance in July after other Roses are gone. Color most beautiful shade of pink. The stems turn red in Winter. There are also clusters of crimson fruits, making an attractive Winter decoration. Fine strong, large, 2-yr.-old plants, \$1.25 each.

STRAWBERRIES

Bradley grown Strawberry plants are most profitable; many growers are making from \$500.00 to \$1000.00 per acre. You can do the same.

Our large, healthy well-rooted plants are grown on new ground that is especially adapted for growing fine plants. We grow Strawberries for plants only. Plants taken from fruiting beds are almost worthless and will not produce large crops of fruit, nor will the quality of the fruit be nearly so good. Most failures in Strawberry growing can be traced to poor plants; a small undeveloped plant will never produce a good crop of fruit, nor will the plants that come from it. You can grow more berries from one acre of large, well developed plants than you can from two acres of small plants taken from fruiting beds, hence it will pay you big to start right.

Strawberries should be planted in rows 3 feet apart and the plants 18 inches apart in the row, and it requires 7260 plants to set an acre. When setting out plants, make holes with a spade by putting it in the ground 5 or 6 inches and pull toward you then take it out; hold plant in hole with hand and close hole with foot and press firmly with feet on both sides. This is the general way of planting Strawberries, and we recommend this method.

Our Strawberry Plants Are All Perfect Varieties. That is, you need not plant other varieties with them to fertilize their bloom. Every variety we list has been thoroughly tested and will do well any place where corn will grow.

Cincinnati, Ohio, March 30, 1926.
Dear Sirs: Your shipment came last Saturday. Thanks for prompt attention. This order was in fine condition; everything looked fine and is planted in its permanent place. Last year's strawberries which you sent are all looking fine.

MRS. J. T. CUMBERLAND.

Big Crops.

Care of Plants When Received

If the ground is not ready when the plants reach you, an easy way to keep their full vigor ready for planting is as follows: Carefully separate the varieties—take each variety, a bunch at a time, cut the strings, and spread the plants in a thin row along one side of a shallow furrow. Then cover the roots firmly with soil, not higher than the crown. If ground is dry, water the roots only. They will keep in good condition for 8 to 10 days. When transplanting to the field, be careful not to mix the varieties.

Another reason why it pays to plant Bradley's plants. This kind of yield makes Strawberry growing profitable.

YOUR DOLLAR HAS TWICE ITS PURCHASING POWER WHEN DEALING DIRECT WITH US, THE GROWERS, FOR THE MIDDLE-MAN'S COMMISSION REMAINS IN YOUR POCKET.

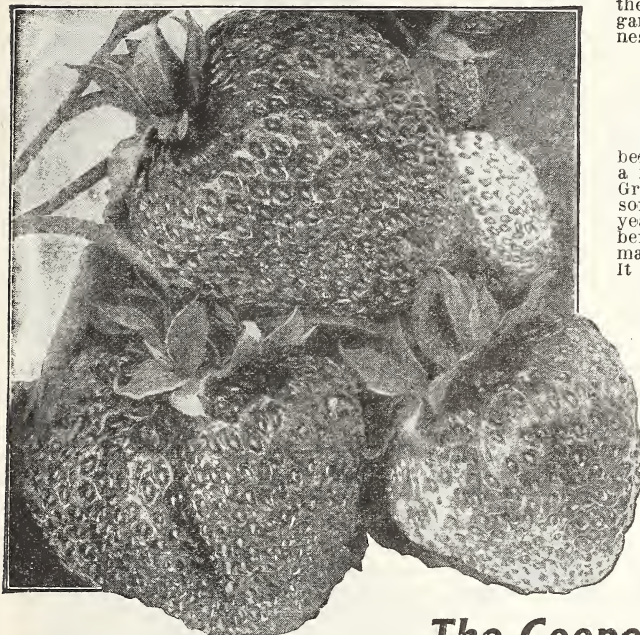

Bradley's Big Four Money Makers

Earliest to the the latest, covering the entire season. Best for the family garden, best in quality and productive-ness, the cream of over 400 varieties.

Premier The Earliest of All

This is undoubtedly the best early berry of them all, and the Premier is a money-maker for the market grower. Growers who have tried all the leading sorts for the past twenty or more years, claim they have never fruited a berry that will come anywhere near making the money that Premier does. It does not seem to have any weak

points. The plants are strong vigorous growers, very productive. of beautiful glossy, rich red berries with bright green cap, which adds much to their beauty. The berries are delicious in quality, and it is one of the best shipping berries. Whether you want a berry for your home table, local market or for long distance shipping, you cannot afford to overlook Premier. It begins ripening with the early sorts, and lasts until most of the midseason sorts are through. There is a great demand among the growers in the big shipping sections for Premier, as it was by far the best money-maker of them all last season. Reports come in from all sections of the country, saying it can't be beat.

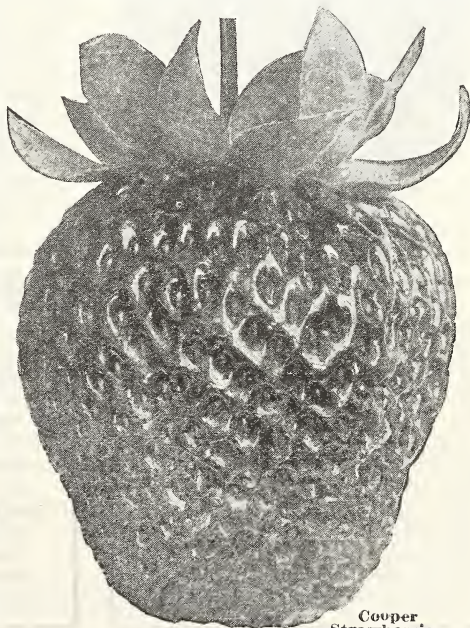

Premier Strawberries.

The Cooper

Ripening Directly After Premier.

In the Cooper we offer Strawberry growers the variety that they have tried so hard to find. A big berry that is productive and possesses all other necessary features to make it a profitable variety to grow. In fact it is all that can be desired and customers who have fruited the Cooper say they prefer it to any other variety. It is a big producer of fancy berries that will bring your own price, and will create a demand that no other variety can fill. Cooper is an extra large, upright growing plant, with an unsurpassed root system, which enables them to bring the enormous loads of fruit to maturity in dry seasons and under adverse conditions, where many varieties would prove almost a failure. The Cooper commences to ripen with other midseason varieties and extends over a long season, and the fruit ripens evenly without any green tips or hollow centers. If you are going to plant Strawberries very extensively and want the BIGGEST AND BEST BERRY GROWN plant some COOPER.

Cooper Strawberries.

Bradford, Ark., May 3, 1926.

Gentlemen: The order of nursery stock, raspberries and strawberries, I mailed you about 10 days ago was received a few days ago in the best of condition and were by far the best stock of that kind I have received. I am very sorry I haven't ordered all my stock from you, after seeing the difference between yours and a lot I received from another nursery. I want to plant a lot more this Fall and will mail you the list.

Yours truly,
J. C. MORROW.

Mt. Vernon, Ind., April 1, 1926.

Dear Sirs: The strawberry plants are all right, and I am well pleased with them. Many thanks for the rose bush.

MISS AGNES BOCKSTAHLER.

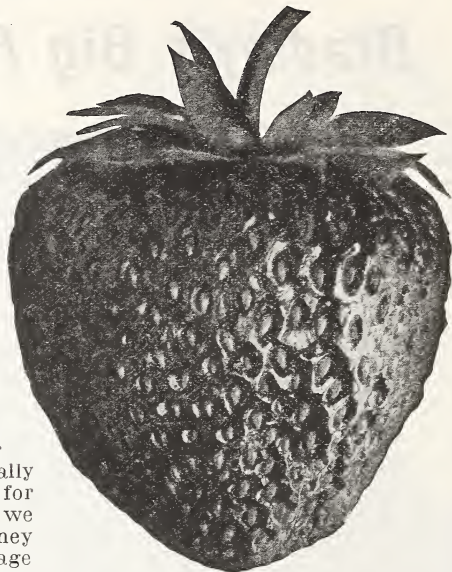

WE PREPAY THE PARCEL POST OR EXPRESS CHARGES.

The World's Wonder

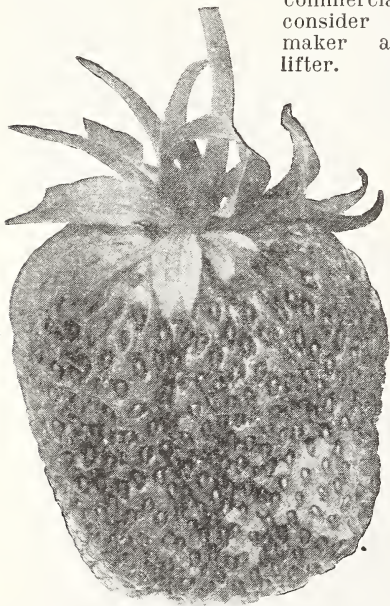

This is truly a wonderful Strawberry. Season of ripening following Cooper. Berries extra large, deep red; strong, rank, thrifty grower; with a mass of long roots and is well adapted to any soil or climate, seem to do equally well North, South, East and West. It is wonderful as to productiveness, producing great clusters of large, well shaped berries that are very attractive and handsome.

The commercial grower will find it highly profitable because its berries are large, firm, and ship and carry extra well. It is one of the very best varieties for the home garden as its berries are so sweet, mild, delicious, firm and meaty that they are relished as dessert when served with little or no sugar.

Our strongest endorsement cannot express our admiration for World's Wonder and we especially recommend them for the home garden as well as for commercial planting; we consider them a money maker and a mortgage lifter.

World's Wonder.

Extra Late Giant.

Extra Late Giant

One of the largest Strawberries grown, ripening after all other varieties have gone. Mammoth in size, many of them measuring $4\frac{1}{2}$ to 6 inches around and hold their size well to the end of the season; surface smooth and glossy, bright flame color, meaty texture, very fine quality, mild, rich, sweet, with the flavor and aroma of the wild berry pronounced.

Productiveness—The vines are simply loaded with berries. One can hardly understand how the vines can produce such loads of large, well matured berries.

Size and Color—Berry extra large; a beautiful glossy red; the flesh of the berry is red clear through.

Quality—The flavor is as fine as can be found in any berry; a perfect table and canning berry and a berry which sells itself on any market. Succeeds upon almost any soil and under all conditions and is called the "Poor Man's Berry" and the "Rich Man's Berry."

Caseville, Ky., Mar. 31, 1926.
Dear Friends: Have delayed in writing you. I received the trees in good condition and am well pleased with them; will favor you with an order this Fall.

JOHN METZ.

Milwaukee, Wis., Nov. 2, 1926.
Dear Sirs: Am in receipt of stock and wish to extend to you my special thanks. These trees are stronger and better rooted than any trees I have ever purchased. I have recommended your firm to several of my friends. Should I ever purchase more trees, shrubs or the like, I will surely think of your firm and give you the order.

M. H. BEYERS.

BRADLEY'S BIG FOUR STRAWBERRY GARDEN

COLLECTION NO. 1 Containing 400 plants; 100 each of 4 varieties for \$5.00, delivered free. 100 Cooper, 100 World's Wonder, 100 Premier and 100 Extra Late Giant. Total value, \$7.00.

Special delivered price **\$5.00**

COLLECTION NO. 2. 25 plants each of Cooper, World's Wonder, Premier and Extra Late Giant. 100 plants, 4 varieties, postpaid, for **\$1.75**

Extra Early Giant

This variety is the largest and most productive extra early berry we have ever fruited. We always sell large lots of plants of this variety and have never had a single complaint, but hundreds of testimonials praising and re-ordering more plants of this grand, good, extra early berry.

SENATOR DUNLAP. This is the leading Strawberry throughout the United States and the demand for this variety has steadily increased every year since its introduction. It does very well everywhere and produces enormous crops of fine fruit regularly. Senator Dunlap has a perfect blossom. Is hardy, productive, a splendid keeper and seems able to produce a good crop under any circumstances. Senator Dunlap is a very heavy bearer of good size, evenly shaped fruit of a very beautiful, dark red color, and its flavor is delicious. For canning it is fine, making a rich, red syrup. It is a first class shipper and retains its brightness long after being picked. It looks well on the market and sells at top prices. The best proof we have that this berry is a big money maker is the fact our customers in nearly every state in the Union are ordering Senator Dunlap in large quantities every year, often planting several acres. We guarantee Senator Dunlap to make you a good big profit.

AROMA. It is unquestionably the heaviest yielding and most profitable extra late variety yet introduced. The demand for Aroma plants is tremendous, there is never enough to supply the increasing demand. In matter of productiveness, quality, flavor and market value, the Aroma is so much superior to the other old standard late varieties, that we urge our customers to plant Aroma heavily and increase their profits by prolonging their berry season. There is mighty big money in growing late varieties as they come into bearing when the rush of the season is over and command big prices. Aroma does well wherever grown and bears a heavy crop regularly. We have never heard of a failure

with Aroma. The plants are large and heavy crowned; ideal for hill culture, also for matted rows or other systems. Order Aroma. We will guarantee you satisfaction.

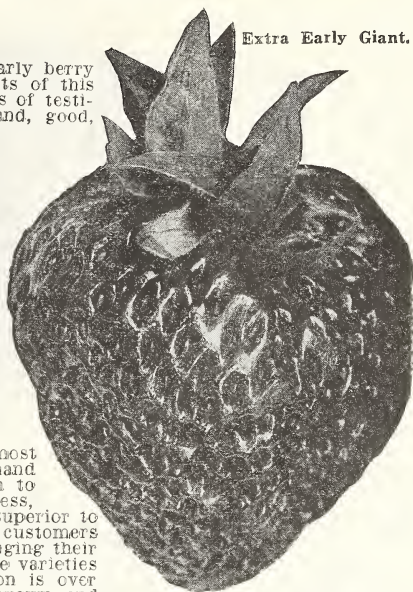

KLONDYKE (Improved). The standard berry for the southern and middle states; does fairly well in the North. Productive, brilliantly colored and so firm that on the northern markets it classes as a re-shipper. It commands top-notch prices.

GIBSON. Without doubt this is one of our best berries. The plant growth is very good and the plant is larger than the Dunlap. It is wonderfully prolific and the berry is excellent for market, of bright color and holds up well. The plant is a thrifty grower and all that can be desired.

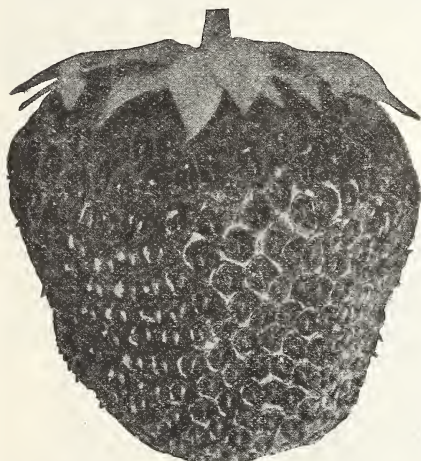

GANDY. This is one of the most reliable, large late berries that is grown. It is one of the old standard varieties that you can depend upon. It is a strong grower and a good plant-maker. The large, handsome appearance of the fruit always commands for it a high price in market. The fruit always grows large and is one of the best shipping varieties known.

EATON. Remarkable size, excellent color and superior flavor combine to make this one of the really worthwhile recent introductions. A great yielder, while its dark red color makes it one of the most desirable for canning.

CHESAPEAKE. Where properly grown, on rich soil, this berry is well-nigh perfect. The berries are uniform in size and shape, mostly heart-shaped; the color is bright crimson and the flesh firm and of excellent quality. Ripens from midseason to late.

Extra Early Giant.

Aroma.

Price List of Strawberry Plants

Wholesale price of Strawberry plants, delivered:

IF INTERESTED IN ENOUGH PLANTS FOR SEVERAL ACRES WRITE FOR SPECIAL PRICES.

Everbearing Strawberries

By planting such grand varieties as Mastodon, Champion and Perfection Everbearing Strawberries you can have fresh, ripe fruit from May until freezing weather. These varieties commence to bear fruit in about sixty days after planting. Everbearing are the only Strawberries that will yield fruit the same season planted. Strawberries are very delicious any time, but are especially so late in the Fall when all other berries are gone. Everbearing are easy to grow, requiring about the same attention and cultivation as the Spring bearing sorts, and the same number of plants are required per acre. There is always a ready market at big prices for Strawberries in the Fall, hence they are commercially very profitable.

Mastodon Grand New Everbearing

See Center Color Page.

The Mastodon is the largest and heaviest yielding everbearing Strawberry we have yet produced. We have been testing this berry for more than three years as we were not willing to recommend it to our customers until we knew that it was better than what we already had. Have found it as near perfect in every way as a berry could be; fruit extra large, has a fine, bright red color, plants strong, vigorous growers, having a long, deep root system which enables them to withstand long, hot, dry seasons. Berries extra firm and ship and sell well. They will absolutely produce ripe fruit within 60 days after planting. In the Spring they produce as large and as profitable a crop as any Spring bearing variety. They start bearing again in about three weeks and continue to fruit until freezing weather. We stand back of this grand variety absolutely, and highly recommend it for both home and commercial planting.

When you plant Mastodon you have the largest, most delicious and biggest yielding berry that money can buy. In commercial beds it is making the growers rich; for quick and profitable results by all means plant this grand variety.

Champion

The fruit is very large, of excellent flavor, fine quality and very productive both in the Spring and Fall; they yield a crop all during the Summer and Fall up to freezing weather. Plants are hardy, thrifty growers, and withstand hot, dry weather, as well as any variety with the exception of the Mastodon. We have personally tested this variety, and can highly recommend it for both home and commercial purposes.

Perfection

This variety won the \$1000.00 cash prize offered for the most perfect everbearing variety, hence its name. It is unusually productive. Uniform well formed large berries of a deep, rich red color, fine, delicious flavor. Perfection fruits regularly during the entire Summer and Fall; fine berries, remaining under the heavy foliage even after freezing weather. The plants are large, strong, vigorous, with long clusters of roots that enable the plants to mature their great loads of berries to perfection. This is an ideal berry for home use, and also a good shipper.

Special low prices Everbearing Strawberry plants, delivered:

	25	50	100	250	1000
Mastodon	\$2.50	\$4.75	\$9.00	\$20.00	
Champion	1.00	1.50	2.00	4.50	15.00
Perfection	1.00	1.50	2.00	4.50	15.00

RASPBERRIES

Raspberries probably rank first of all in bush fruits for commercial importance. They will do well on any soil that will produce a corn crop, require but little care and attention. Every family should have at least enough Raspberries for their own use. They are fine for pies, canning, jellies and jams. A bed will not only give you pleasure, but also profit as they command high prices and are always in demand. A bed once planted is good for many years without much attention. Both red and black Raspberries are highly profitable to the fruit grower; they yield big crops and sell very high in any market. Planted in rows four feet apart each way 2700 plants are required per acre.

Raspberries for Everyone—Everywhere. Raspberries to can, to make into delicious preserves, jellies, jam—so good they will make the mouth of a mummy water; Raspberries for all the children—for all the grownups—for every meal—when you just can't think of anything for dinner. You can grow them yourself on your own ground at little cost; you can have these fresh on your table from June till November by planting the Everbearing varieties.

Genuine Everbearing Raspberries

La France

(See inside center color page)

Giant Everbearing Red Raspberry—Big, Rich, Sweet, Juicy Berries from July Until November.

The berries are twice the size of other Raspberries, wonderfully delicious in flavor; firm; the size of the berry and its delicious flavor are the same from first to last. The late crops, when Raspberries are scarce and therefore highly priced, are heavier than the earlier ones.

La France is a prodigious bearer throughout the season, from late June until all vegetation is killed by frost.

The bushes of this remarkable Raspberry are rapid, vigorous growers, often reaching a height of nine feet. The canes are strong and erect, frequently an inch or more in diameter with practically no thorns. This makes berry picking comfortable. The canes branch freely adding greatly to their productivity.

The Fruit. The fruit is borne on racemes, one to three feet long in very large clusters and the same racemes show the unusual sight of buds, blooms, fruit just setting, green berries and the ripened fruit. This condition continues through the entire season.

The La France is all "meat;" all berry; not all seeds.

La France Red Raspberry fruits early in June, continuing throughout the growing season; after being established they will bear as early as June and as late as November last and later, so long as heavy frost has not killed all vegetation.

La France is perfectly hardy and has been thoroughly and successfully tested in various parts of the country.

It is the best for home garden and a "GREAT MONEY MAKER FOR BERRY GROWERS."

LA FRANCE, Holds the World's Record.

Has been awarded the World's highest medal over all other RASPBERRIES.

Awarded Silver Medal by Tarrytown Horticultural Society also by the Connecticut Horticultural Society.

ST. REGIS. Another very early Everbearing Raspberry; very early, bright red color, fine flavor, and produces fruit from Spring to Fall. Fruit small to medium in size, firm and a good shipper.

WELCH (Honey). Red. So sweet and rich in flavor and is known as "Honey Raspberry." Berries large size, good bright crimson color and honey sweetness, melting and luscious; very fine quality. Canes vigorous, hardy and productive. Especially recommended for home use.

Welch (Honey) Red Raspberry.

WE PAY ALL TRANSPORTATION CHARGES TO YOUR NEAREST STATION.

King of Cliffs Raspberries.

King of Cliffs **Everbearing Black Raspberry**

The most wonderful black Raspberry ever introduced. Extra large in size, enormously productive. The earliest black Raspberry grown; flavor very delicious, of honey sweetness, small seed, black, glossy color, long season of ripening places it in a class unapproached by other varieties. Canes of iron-clad hardness enduring the severest cold uninjured. Large, upright thrifty grower; wonderfully productive. Canes not affected by any diseases; withstands heat and drought better than any other variety on account of its deep growing root system. A very profitable commercial variety.

King of Market **Red Raspberry**

Is the largest red Raspberry we have ever tested with the exception of the La France. Berries are very showy and attractive in color, firm, sweet, juicy with very small soft seed. Bears a heavy crop both in the Spring and Fall. As a Spring variety it has few equals as to large size of berries and productiveness; sells at a premium over other varieties on the Chicago market. This variety is being planted here in the fruit

belt more than any other variety. The vines in the Fall are laden with large, brilliant red berries, and they continue to bear until freezing weather. We highly recommend this berry for both the garden and for commercial beds. Don't fail to include a few in your next planting.

Cuthbert **Red Raspberry**

The leading red Raspberry, the standard main-crop variety. It is very productive of large, conical, rich crimson berries, and altogether it presents a very handsome appearance. The flavor is delicious and the fruit as a market berry and a shipper has no superior in red Raspberries. The season is medium to late.

CENTERVIEW POULTRY FARM **Veedersburg, Ind.**

March 25, 1926.

Gentlemen: Received fruit trees and berry plants today, all in A No. 1 condition. The peach trees have buds on for bloom and they don't look like they have ever been removed from the ground. Thanking you for the promptness and fine quality of fruit trees and plants, we remain,

Centerview Poultry Farm,

M. R. JONES, Prop.

WHEN YOU BUY FROM BRADLEY BROTHERS YOU KNOW JUST WHAT YOUR STOCK IS GOING TO COST DELIVERED.

Honeysweet Raspberries.

HONEYSWEET. Black. Berries extra large, glossy black, firm and remarkably rich, of honey flavored sweetness and very luscious; oblong in shape, very meaty, very small seed; flavor unsurpassed; hangs on the vine a long time. Berries are produced in great abundance; sells for a premium over any other variety. The fruit pulp surrounding the seed is full of thick, sweet juice; very little sugar is necessary in serving or canning.

BLACK DIAMOND. One of the best for home and market use. For drying and evaporating it excels all others. The fruit is large, sweet and excellent.

PLUM FARMER. Has been thoroughly tested in western New York where it is a great favorite for market and home use. The fruit is very large, often measuring an

inch in diameter. Brings the highest prices on the market.

CUMBERLAND. The business blackcap. It is of wonderful productiveness, producing regularly and uniformly very large crops. In size the fruit is simply enormous, far surpassing any other variety. The berries are seven-eighths and fifteen-sixteenths of an inch in diameter. In quality it is similar and fully equal to the Gregg. It is unusually firm and is well adapted for long shipments. It is an unusually strong grower, throwing up stout, stocky canes, well adapted for supporting their loads of large fruit.

For an order amounting to two dollars or more we will give Free 1 Hubbard Grape or 1 Bradley's Beauty Rose. Be sure to state on the order sheet which you want.

JUNIOR COLLECTION. 12 plants each of above 4 varieties, prepaid **\$3.25**

Lancaster, Ohio, Mar. 4, 1925.

Dear Sirs:—

Enclosed find order for King of Cliffs Raspberries. Three years ago I sent for some and they have been the finest berries I ever saw, one stalk has yielded one gallon to the season for two years.

WM. SHULL.

Rockville, Ind., April 2, 1926.

Please send me your catalog right away, we want your prices on strawberry plants. We have used your berries for the last 5 or 6 years and are well pleased with them.

MRS. JESSE ANGELL.

Blackberries are Profitable

The growing of this very delicious and healthful fruit is attended with so little trouble and expense that every garden, however small, should have at least 25 plants. For cooking purposes they are unsurpassed—Blackberry jam cannot be beaten—and they yield a dark wine of excellent quality. There is nothing more delicious than a Blackberry pie. Plants should be planted in the field for commercial purposes in rows 6 feet apart and the plants 4 feet apart in the rows; 1810 plants are required per acre. In the garden plant in rows 4 feet apart and the plants 3 feet apart in the rows. They will grow and do well on any kind of soil, and in any section of the United States. The Blackberry is truly a money maker.

Ambrosia Blackberry

The earliest Blackberry in cultivation, ripening 10 days before the Early Harvest, earlier than any dewberry; ripening with the earliest raspberries and before all of the strawberries are gone. Berries extra large, long, meaty, sweet, mild, of exquisite flavor and surpassing quality; rich in sugar and free from the bitter taste contained in most Blackberries; firm texture; compact and free from any hard core; seed small and so soft that the whole berry melts in one's mouth while eating. Berries hang in large, long clusters more like grapes, easily picked, do not scald, rust or blight, and hold their large size through entire season. Berries very attractive and fine for the table, pies, jelly, jam, and blackberry juice. Canes are absolutely always and everywhere hardy, thrifty and enormously productive, producing 250 cases of 24 quarts per acre; sold in Chicago for \$8 per case on account of extreme earliness, fine flavor, large size and fine appearance. See inside back cover.

WHAT OTHERS SAY ABOUT THE AMBROSIA BLACKBERRIES

The Ambrosia Blackberry is the largest, earliest and best flavored blackberry I have ever seen or tasted. I think it is the best money-making blackberry on the market; I am so favorably impressed with this wonderful extra early berry that I am going to plant 500 plants regardless of price. —H. W. BEECHER, of Illinois.

The Ambrosia is the largest extra early blackberry I have ever seen. Berries hang in large clusters, very productive and hardy.—H. A. RODMAN, Fruit Broker, of Perry Co., Ill.

Ambrosia Blackberry ripens before Gandy strawberries are gone. Berries twice the size of Early Harvest, more productive, better flavor and ten days earlier.—HARRY R. ROW, Fruit Grower.

If I were growing blackberries for market, home consumption, as a money maker, I would grow the Ambrosia exclusively. They ripen extremely early, are very productive, of large size, easy to pick, jet black color and very hardy.—C. R. MODGLIN, Dealer in Fruit.

BLOWERS. This is one of the most remarkable new fruits ever produced. One single bush has been known to have produced 2,694 berries. It has the longest fruiting season of any Blackberry, producing its greatest crop in August, and much in September. It is very attractive for market both on account of its size and its excellent appearance. Usually sells at from one to two cents a quart higher than other kinds.

Blowers Blackberry.

FREE. 1 Hubbard Grape or 1 Bradley's Beauty Rose, with an order amounting to two dollars or more. Be sure to state which you want on the order sheet.

Pensacola, Fla.

Mar. 21, 1925.

Dear Sirs:—

Received your shipment of blackberries in good shape. I thank you very much for the fair treatment you have accorded me. The ones I already have are looking extra well this Spring and I have great hopes of their bearing well.

Yours truly,

L. B. THOMPSON.

Windsor, Conn.

Mr. Graham, who got 1500 strawberry plants wishes me to write and tell you they came in good condition, and he has them all planted and every plant is growing fine.

Respectfully yours,
HARVEY GREEN.

Cory Thornless

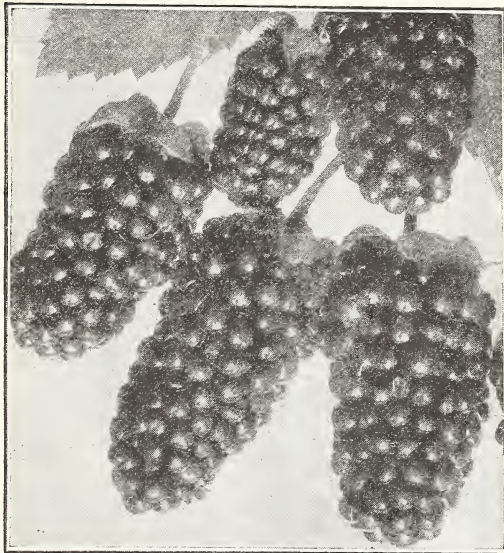

A fine berry without thorns in many sections of the United States, however, on account of many unfavorable reports we have received this year from several locations, we are not recommending that it be planted extensively where it has not been tested.

Texas Everbearing Blackberry

First introduced by Mr. Texas, who brought it from South Africa. This is the greatest acquisition of the day. One grower claims he has picked 108 quarts from a dozen plants. The fruit is borne in enormous clusters, with a long fruiting season. The fruit is firm, melting, sweet and fine for shortcake, dessert, jam, jellies and preserving and almost as large as English walnuts. Canes very hardy, thrifty and an upright grower; seem to do well everywhere and on any kind of soil. These berries are becoming very popular everywhere. Everybody likes them and those who have them want more. Should be planted on every farm and in every garden.

Hoco Blackberry (Honey Coreless)

The hardest and most profitable Blackberry on the market. It is an upright grower, the canes are stiff and abundantly able to hold up the enormous crop of fruit it yields. The berries are extra large in size, $1\frac{1}{2}$ to 2 inches long and almost as thick as they are long. Enormously productive, producing at a rate of 8500 quarts per acre; begin to ripen medium early and continue over a long period of time. Berries are of the finest flavor, sweet, juicy, delicious and coreless, hence its name. As a fresh fruit from the vine it is most delicious for cooking and for

Texas Everbearing Blackberries.

wine it is superior to any other Blackberry. It contains even less acid than the loganberry, making it possible to make luscious jams, preserves and jellies with much less sugar than other Blackberries. For a commercial variety we consider it the most profitable variety. Its productiveness together with its fine shipping qualities enables you to get the top market prices; it is very firm and holds up after being picked better than any variety we have ever fruited. For profit plant the Hoco; it carries our highest recommendation.

S. G. EGGER

Breeder of Long Tailed Japanese Phoenix Fowls
Lewisville, Ohio

Bradley Brothers.

Gentlemen: You certainly do your business promptly and on the square. I was surprised when the mail carrier handed me a bunch of trees, as it was only five days ago that I wrote you about them. I have been dealing with you now for several years and have always been treated very satisfactorily. I got some trees from a nursery farther West than you, who state that no trees are knowingly mislabeled. I wrote them and asked them to replace a mislabeled tree but they never answered my letter.

S. G. EGGER.

Forrest, Ill., March 29, 1926.

Dear Sirs: I received the trees and plants in good condition and better trees than I expected. Last year I sent for 20 grapes from another nursery, and only two are growing. This is the reason farmers are afraid to send to nurseries. If I need something more I will surely send to you. From your customer,

JOSEPH WENGER.

Sugar Creek, Ohio, March 26, 1926.

I received the trees in A No. 1 condition and the strawberries were as green as grass, the roses are the best I ever bought; you had them well packed.

LEWIS ZIMMERMAN.

Hammond, Ill., March 1, 1926.

Dear Sirs: Received the hedge plants this morning in fine condition and am well pleased with them, they are much nicer and better plants than I was expecting to see. Will try to get some others to send to you.

MRS. F. E. TRAXLER.

Hoco Blackberry.

A FEW MORE REASONS WHY OUR BUSINESS CONTINUES TO GROW.

Mersereau.

ELDORADO. The vines are very hardy and vigorous, enduring the winters of the far northwest without injury, and their yield is enormous. The berries are large, jet-black, borne in large clusters and ripen well together; they are very sweet, melting, have no hard core and keep for eight or ten days after picking with quality unimpaired. Perhaps the most valuable sort in cultivation.

WARD. This is a vigorous grower and gives large annual crops of beautiful large berries. The fruit is black throughout, firm and good for shipment, yet tender and melting and of the best quality. This is more largely grown than any other variety. The plant is rust-resistant, and the berries are almost wholly without a core. Midseason.

EARLY HARVEST. Anyone with a good local market will find this variety very profitable as it bears early and over a long season. The fruit is medium size, good quality, of very sweet, delicious flavor. The canes are strong, healthy, upright growers, and produce an enormous amount of fruit. You will find Early Harvest a good dependable variety and much better than a lot of other varieties.

MERSEREAU. Remarkably strong grower, upright, producing stout, stocky canes. Claimed to be the hardiest Blackberry, standing uninjured 20 degrees below zero without protection. An enormous producer of extra-size berries, which are brilliant black and retain their color; extra quality; sweet, rich, melting, no core.

Blackberry Collections

COLLECTION NO. 1. Blackberries all season from earliest to latest. 3 strong plants each of the above 9 varieties, sent postpaid for **\$2.85**

COLLECTION NO. 2. This is a wonderful bargain and a real collection. 12 plants each of nine varieties, regular price \$11.25, sent postpaid for .. **\$7.60**

SATISFIED CUSTOMERS ARE OUR GREATEST ASSETS.

Elwood, Ind., April 3, 1926.

Gentlemen: The fruit trees which I ordered of you arrived promptly and were in good condition, and I am well pleased with them.

Yours respectfully,
CASH C. LUSE.

Paola, Kans., April 1, 1926.

Dear Sirs: The trees and plants ordered from you were received in good condition and they are fine stock. Thanks very much.

P. J. ERNST.

Jersey City, N. J., March 29th.

Gentlemen: I have received the Amoor River Privet hedge which you sent and everything was in first class condition.

Mrs. M. KENNELLY.
